Driving adoption of Copilot Chat

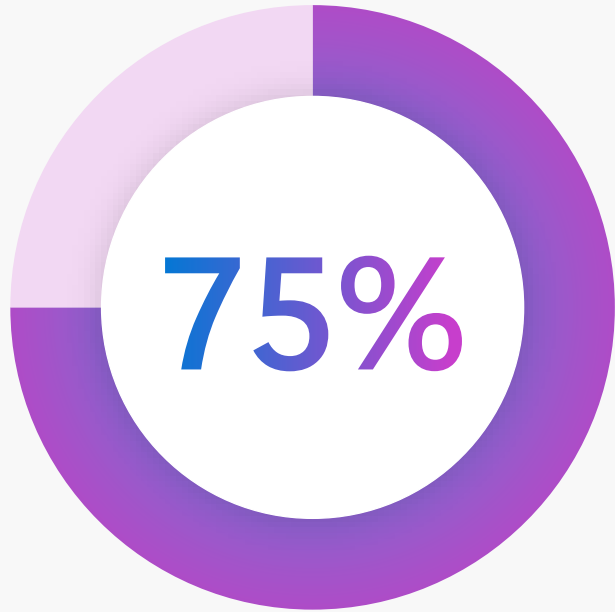

Shadow AI risks and best practices

Next steps

AI adoption is rising, boosting productivity and ROI

**Of knowledge workers
around the world use AI
at work**

\$3.7x

for every \$1 a company invests in generative AI, the ROI is \$3.7x.²

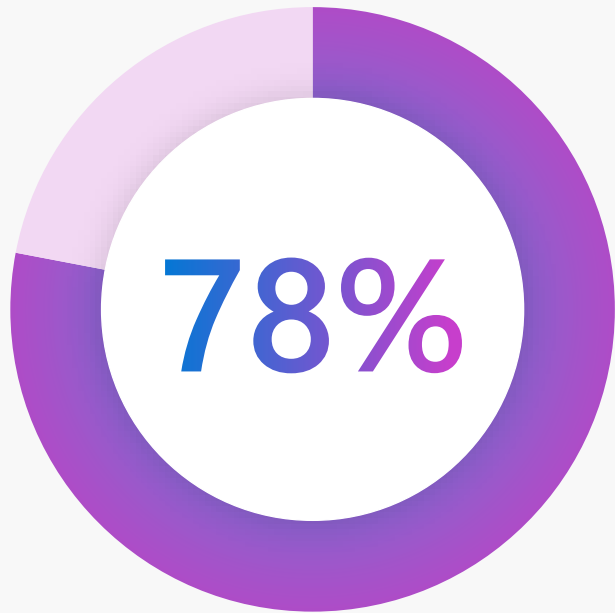

<13

Within 13 months, organizations are realizing the value of generative AI.²

45%

Of AI users say productivity use cases have provided the greatest ROI.²

Security and data protection are crucial for AI readiness

Of employees bring their own AI tools to work.¹

2x

Data security incidents from the use of AI applications nearly doubled in 2024.²

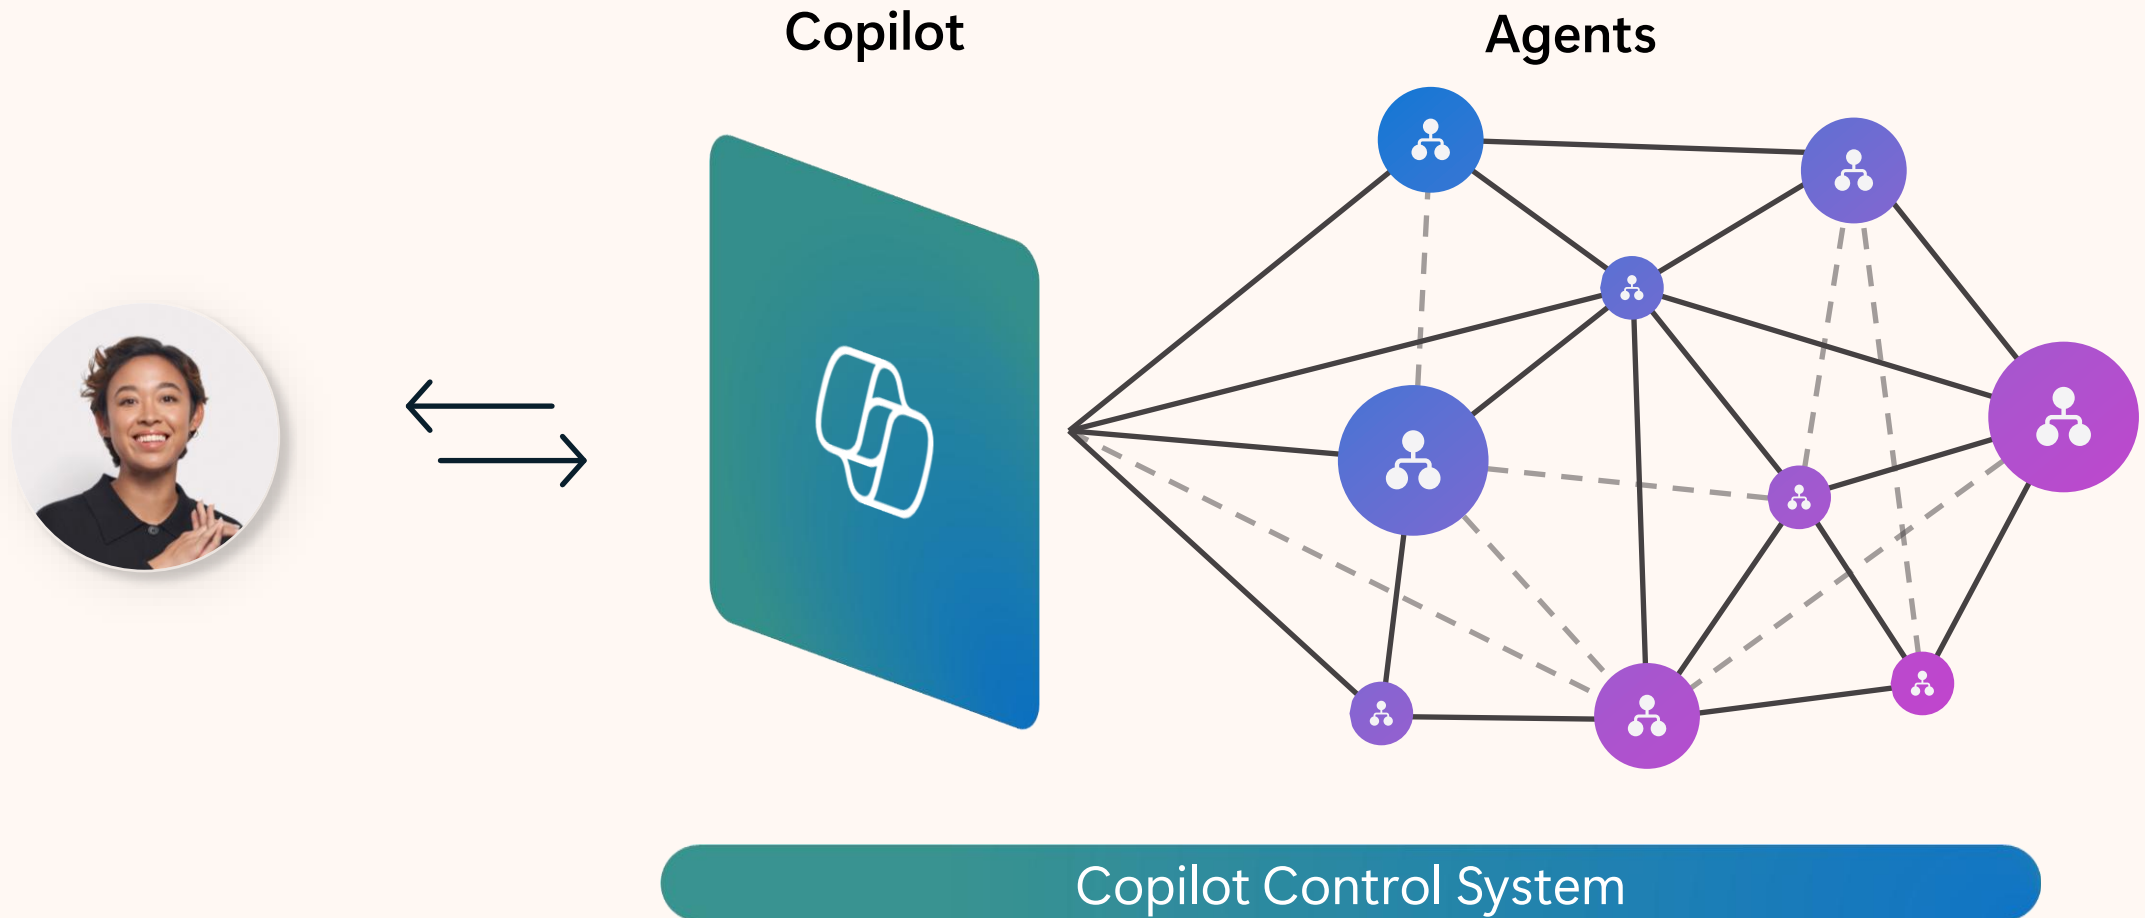

80%

Of leaders cite leakage of sensitive data as a main concern of AI use.³

93%

Of companies took proactive action, implementing new controls for employee use of generative AI.²

Copilot is the UI for AI

Introducing Copilot Chat

Copilot Chat

Free AI chat with pay-as-you-go agents

- Web Chat
- Pages
- Agents (pay-as-you go)
- IT controls

Free chat built for every user in mind to improve productivity

Microsoft 365 Copilot

Your AI assistant for work (\$30)

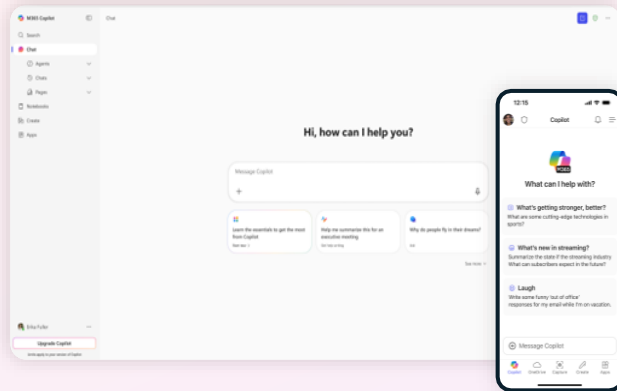

- Agents (included)
- Personal Assistant
- Advanced Management
- Copilot Analytics

Best for knowledge workers needing secure AI assistance

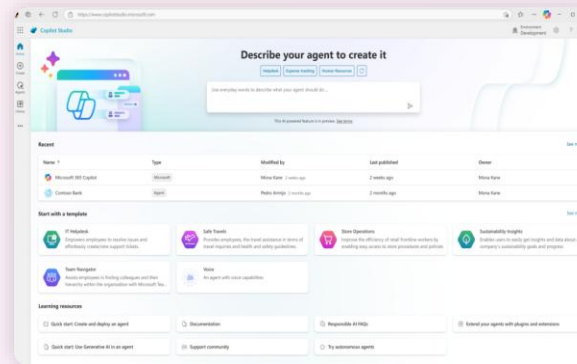

Agents support every Copilot user with by automatizing repetitive tasks and reducing manual work

Copilot Chat

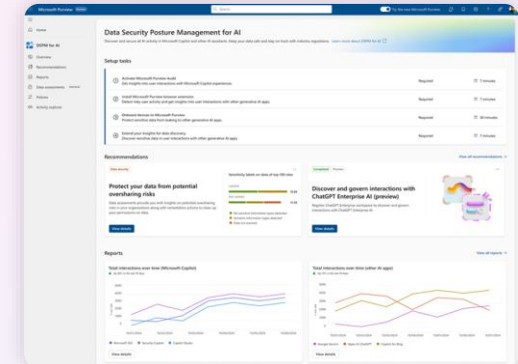

Chat

Copilot Chat delivers secure, web-grounded AI chat in the M365 Copilot app, the web and the Microsoft 365 productivity apps

Agents

Reinvent business processes with agents integrated into the chat experience and paid for on a consumption basis

IT Controls

Enterprise Data Protection and agent management integrated to enhance security, compliance and control across your organization

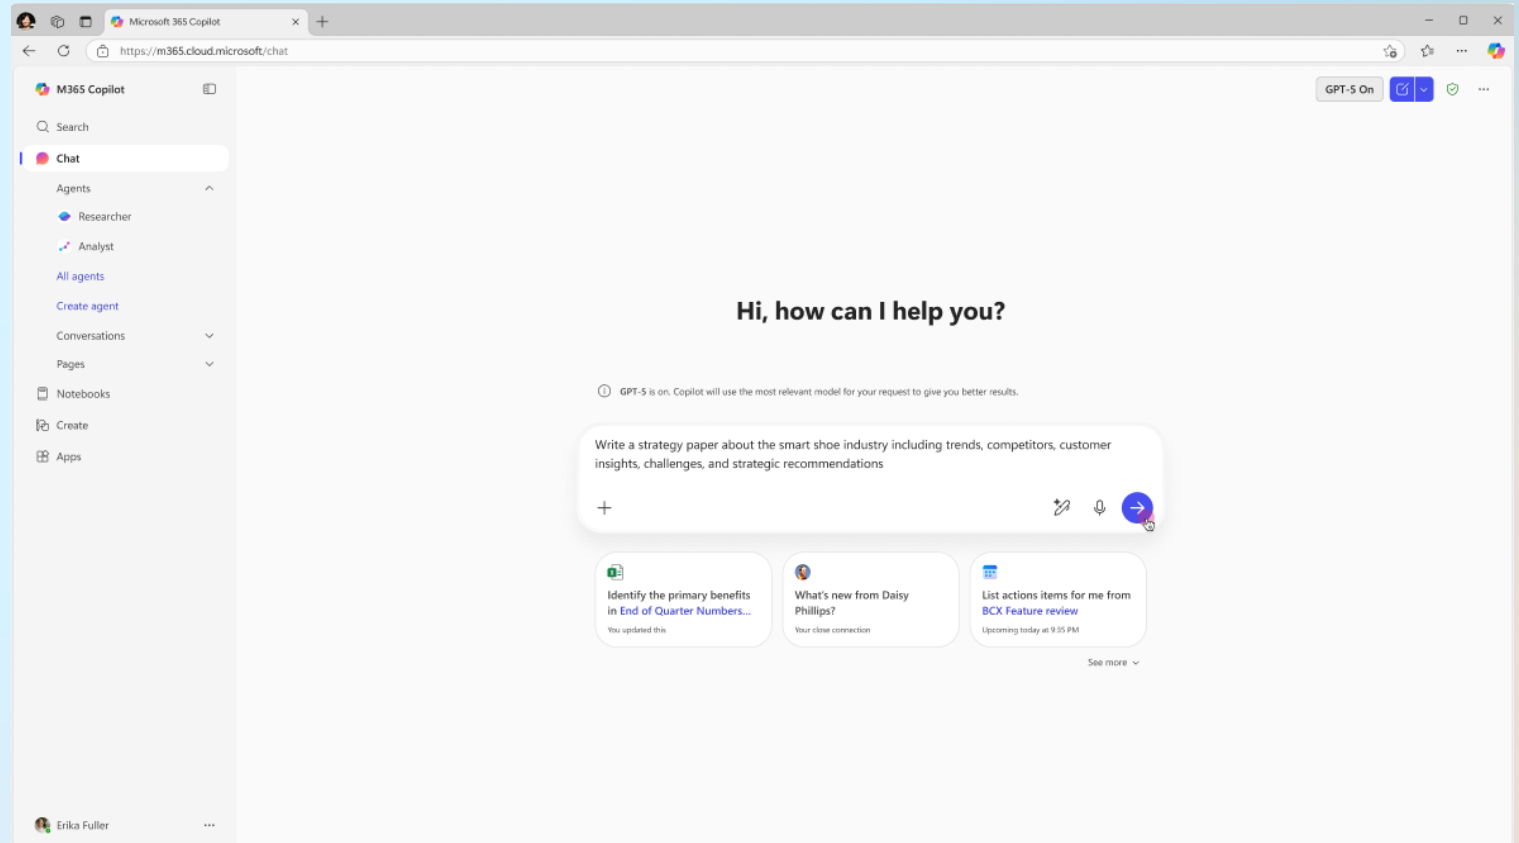

Copilot Chat

Powered by GPT-5

Copilot understands your prompt and uses the **GPT-5 real-time router** to choose the best model.

The **high-throughput model** provides quick, succinct responses to clear-cut questions.

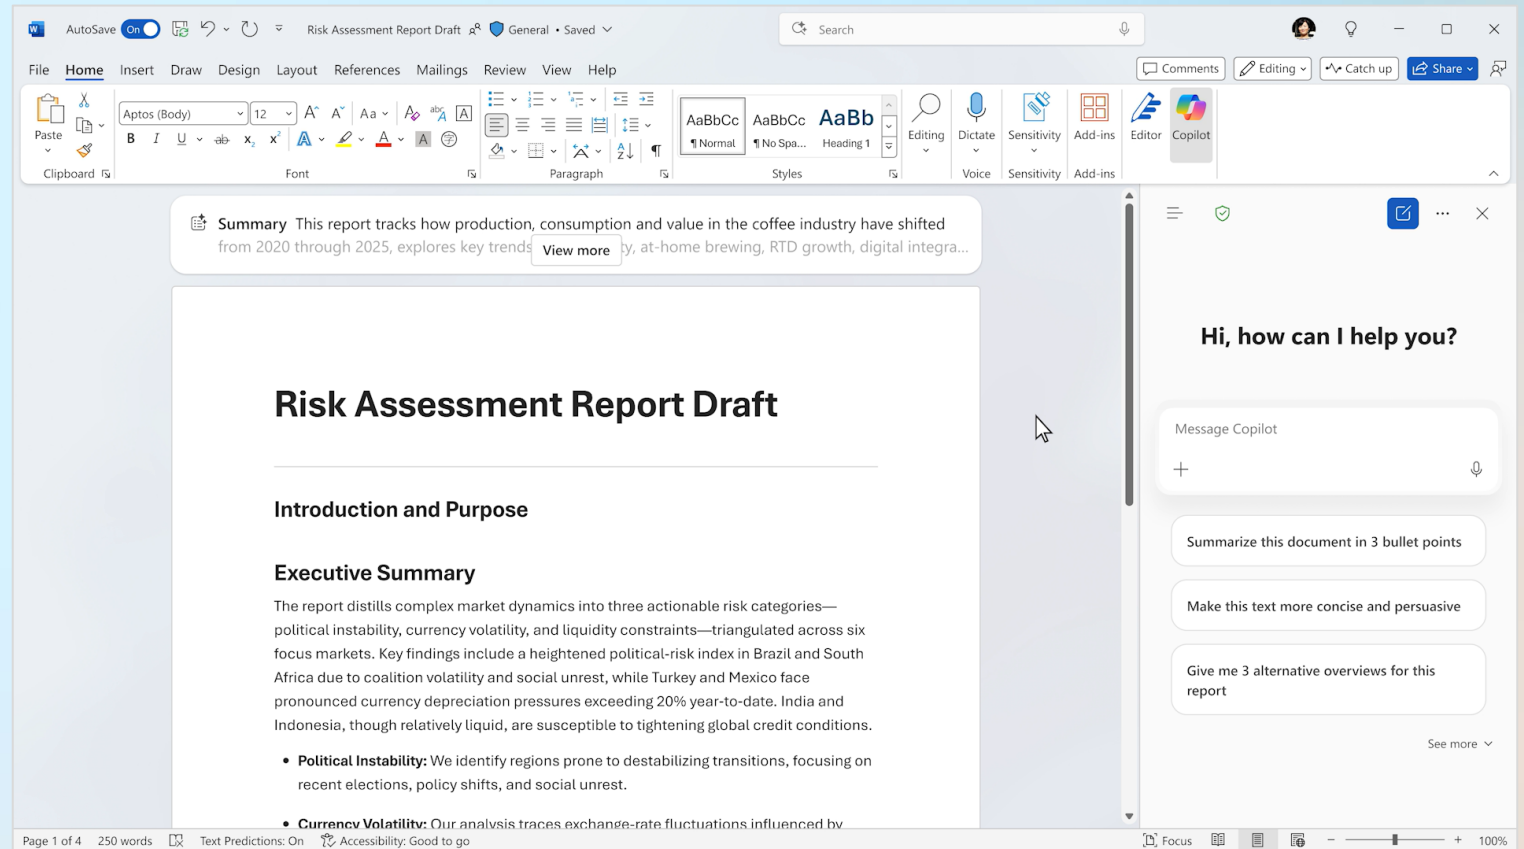

For complex queries, a **deeper reasoning model** crafts a plan, gathers context, and verifies output.

Copilot Chat in Microsoft 365 apps

Copilot Chat is part of the Microsoft productivity suite and can reason over open files in Word, Excel, PowerPoint and OneNote, and your Outlook inbox and calendar

- Brainstorm and create with enterprise ready AI chat in the productivity apps
- Summarize, analyze and get insights from documents, emails, data and presentations

Copilot Chat comes with built in security

Copilot Chat has built-in safeguards to help protect your company data, and prompts and responses are not used to train foundation models

Copilot Chat inherits all your existing Microsoft 365 security and compliance requirements, so only people with the right permissions can access the content it generates

Copilot Chat is a core Microsoft 365 service; the data it uses resides in your geographical region.

through employee
self-service

Agents can range from a spectrum of simple to advanced

IT Helpdesk agent

How do I connect to the corporate network?

Device Refresh agent

Request a new laptop and send approvals via IT Service tool.

Lead Gen agent

The agent has identified and researched 15 new leads for you to review.

Simple

Advanced

Project Tracker agent

What is the status of phase 2 for project X and the remaining budget?

Budget Management agent

Review outstanding open PO's and begin financial planning.

Customer Support agent

The agent has identified new support issues and triaged to other agents.

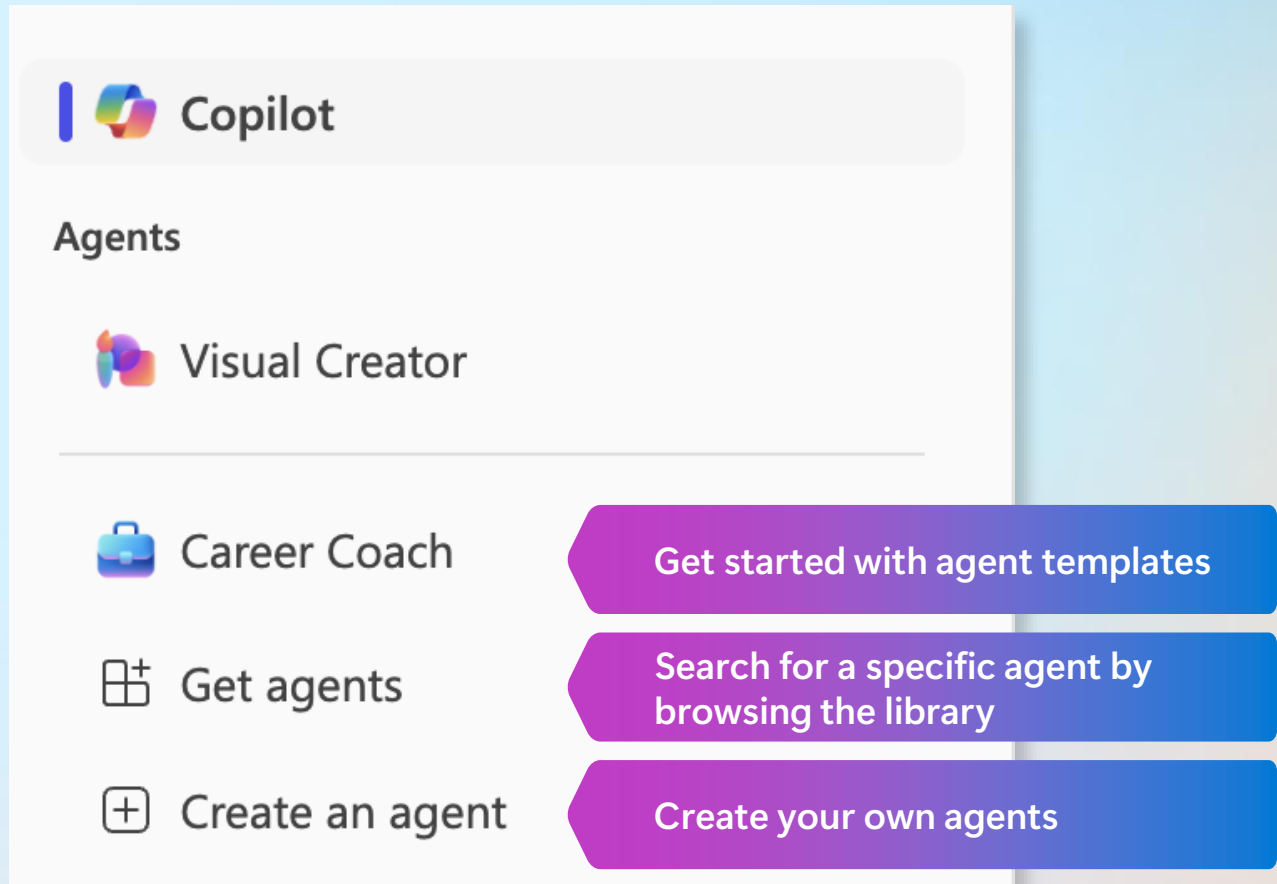

Agents in Copilot Chat

Agents are smart digital team members that can help execute business processes.

Agents can reason over business data in SharePoint and OneDrive as well as data in other apps and systems.

Copilot Chat comes with a set of agent templates that users can get started with, and you can also build custom agents based on your business needs.

[Introducing Copilot agents](#)

Get started quickly with agent templates in Copilot Chat

Agent name	Description
 Writing Coach	Provides detailed feedback on writing. Helps change the tone of messages, translates text, and assists in writing tasks
 Idea Coach	Helps users brainstorm and organize ideas
 Prompt Coach	Assists users in creating effective well-structured prompts for Copilot
 Career Coach	Provides personalized career development suggestions including role understanding, skill gap analysis, learning opportunities, and career transition plans
 Learning Coach	Helps users understand complex topics by breaking them down into simple, intermediate, and advanced summaries. Provides guided practice and learning plans
 Meeting Coach	Helps meeting organizers create and ensure meetings are productive, engaging and well organized
 Customer Insights Assistant	Designed to help your team get to know your customers by providing relevant information and insights
 Interview Questions Assistant	Provides professional guidance in question generation tailored to specific job roles, or industries
 Quiz Tutor	Creates interactive, fun, and engaging quizzes based on training documentation. It provides coaching on answers, praises correct answers, and offers explanations for incorrect ones
 Scrum Assistant	Supports scrum team members in facilitating scrum ceremonies, backlog management, and continuous improvement

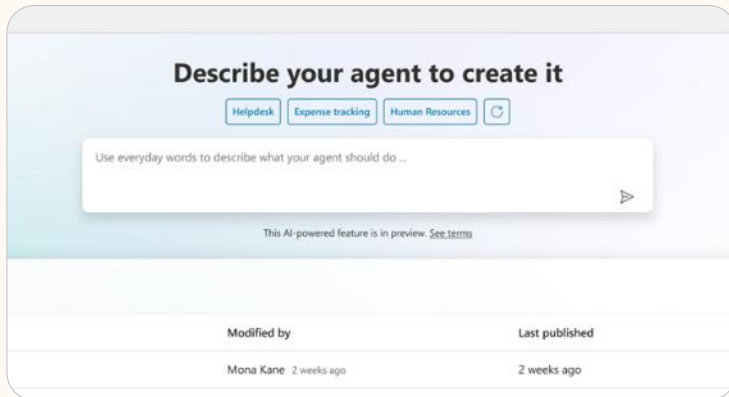

Create simple custom agents quickly to fit your business

Examples of simple agents:

Agent name		Description
	Peer Feedback Agent	Supports content creators in writing post content, brainstorming ideas, identifying trending topics, and suggesting content improvements.
	Marketing Agent	Supports content creators in writing post content, brainstorming ideas, identifying trending topics, and suggesting content improvements.
	Statement of Work Creator	Guides users through the process of gathering project information, defining scope, responsibilities, deliverables, and other essential elements.
	Training Content Writer	Provides support throughout the content creation process, ensures learning materials are tailored to your corporate audience and aligned with your organizational goals.
	Product Comparison Agent	Supports procurement managers by automating research and analyzing feature sets, pricing models, customer reviews, and integration capabilities to offer data-driven recommendations.

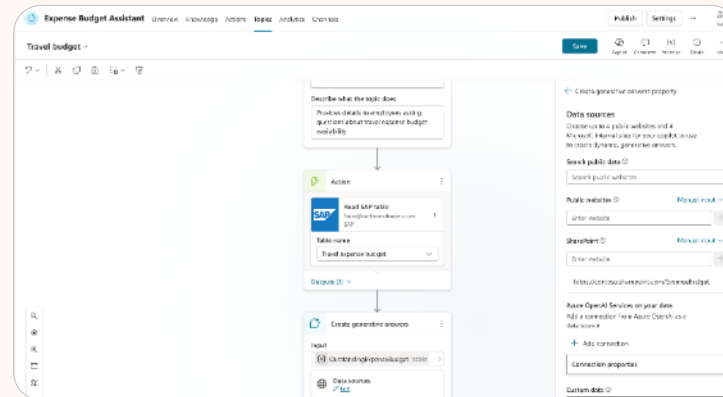

Create agents using natural language in Copilot Studio and customize further, if needed, with code using advanced tools like Azure AI

For business users and developers

Copilot Studio lite Natural language

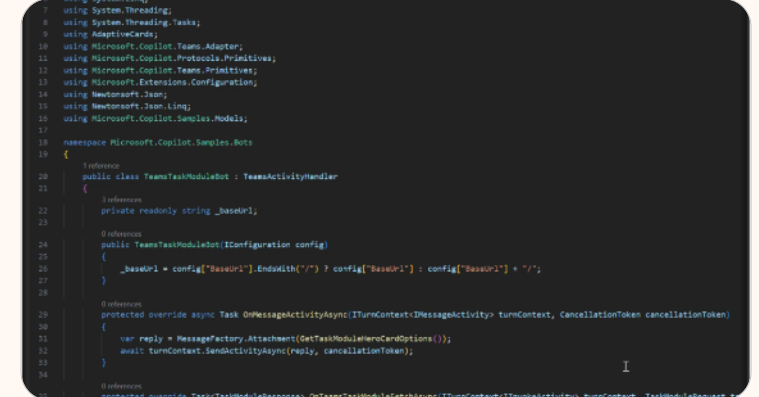

Build agents by engaging in a conversational, natural, human-like experience in Copilot.

Copilot Studio Drag and drop

Design your agent by uploading files, adding capabilities, and providing instructions with a few clicks.

For developers

Azure AI Foundry Code

Customize agents using advanced developer tools like the Microsoft 365 Agents SDK, VS code, and Azure AI.

Copilot credits purchasing options

Credit packs

- ✓ Tenant-wide credit packs
- ✓ 25,000 credits/month
- ✓ \$200 per pack/month

Pay-as-you-go

- ✓ PAYG meter
- ✓ \$0.01/credit
- ✓ Pay only for what you use

Agent pre-purchase P3

- ✓ Agent Commit Units (ACU)
- ✓ Discounted volume rates
- ✓ Valid for 1 year

Recommended approach:

Start with **pay-as-you-go** to pilot and estimate monthly agent consumption, then pre-purchase ACU's for the coming year at 5-15% discount

100 ACUs = 100 Copilot Studio credits

Set up & manage Microsoft 365 Copilot Chat

Managing Microsoft 365 Copilot Chat

Administrators have multiple options to manage the Microsoft 365 Copilot Chat experience for their users.

[Manage Microsoft 365 Copilot Chat](#)

The following administrative management options are available

- Manage access to Microsoft 365 Copilot Chat
- Manage web search queries in Microsoft 365 Copilot Chat
- Manage Copilot Edge settings and behavior
- Manage Microsoft 365 Copilot Chat in Microsoft 365 mobile apps

Set up Copilot Chat

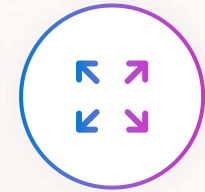

**Activate user
access**

**Enable data
access**

**Drive adoption
and change
management**

**Expand with
agents**

Step 1: Activate user access

Copilot Chat is enabled in Teams for regions except EU. If you have previously uninned Copilot Chat you can pin it back manually.

Make Copilot Chat visible in Teams and Windows taskbar: AI admin logs into M365 Admin Center and navigates to Copilot → Settings → User access → Pin M365 Copilot Chat. Check "Pin Copilot Chat in M365 apps". Go back to User access and select "Pin Copilot apps to the Windows taskbar" and save. Learn more [here](#).

Pin Microsoft 365 Copilot Chat

Copilot Chat is the secure and compliant generative AI chat experience that's already available to everyone in your organization. Pin Copilot Chat in Microsoft 365 apps and to the Windows taskbar to make it easier for people to find and use it.

[Learn how users can be more productive with the Copilot Chat and agent starter kit](#)

In Microsoft 365 apps

Pin Copilot Chat for your users in their Microsoft 365 apps on web, desktop, and mobile. Users with a license for Microsoft 365 Copilot will have it pinned by default.

[Learn more about how this setting works](#)

- ☒ Pin Copilot Chat in Microsoft 365 apps (recommended)
- ☐ Do not pin Copilot Chat in Microsoft 365 apps ⓘ

On the Windows taskbar

Go to the setting in admin center,

[Pin Microsoft 365 Copilot apps to the Windows taskbar](#) to enable pinning so that it's easy for users to find

Step 2: Enable Copilot Chat data access

Enable web search for Copilot Chat to activate Copilot Chat's access to the web: In Copilot → Settings → Data access → Web search for M365 Copilot and Copilot Chat, confirm that web search is enabled. If disabled, follow the prompted steps to adjust the policy.

Reduce shadow AI use: Redirect users using shadow AI to Copilot Chat. If licensed, use [Microsoft Defender for Endpoint](#) and [Microsoft Defender for Cloud Apps](#) to detect and monitor use of unsanctioned AI.

Allow web search in Copilot

Platforms

Windows, Mac, iOS, Android, Office on the web

Applications

Office

This policy setting controls web search availability when using Microsoft 365 Copilot or Microsoft 365 Copilot Chat.

Web search...

[Show more](#)

Configuration setting

Enabled

Additional setting

Options

Enabled in Microsoft 365 Copilot and Microsoft 365 Copilot Chat

Step 3: Drive adoption and change management

Drive employee awareness of Copilot Chat: Send an [organizational Teams message](#) or email to drive awareness of Copilot Chat availability.

Train employees on how to access Copilot Chat via the web (m365copilot.com), Teams, the Microsoft Edge sidebar and the M365 apps (Word, Outlook, Excel, PowerPoint, OneNote).

Train users how to prompt and use Copilot Chat across the apps: Share the [Copilot academy](#) with employees and use the [Copilot success kit](#) and the [Copilot Chat IT admin](#) resources to grow adoption and help users create a daily Copilot habit.

Monitor usage: Global Admin & reports reader can track usage in M365 Admin Center → Reports → Usage. Under [M365 Reports](#), select Copilot Chat usage. Use the report to tailor your trainings and to help users get the most out of Copilot Chat across all apps.

Introduce agents to grow usage further by reasoning over company specific data. Learn [more](#).

Copilot Chat Prompting do's and don'ts

Do's

- ✓ Be clear and specific.
- ✓ Keep it conversational.
- ✓ Give examples.
- ✓ Ask for feedback.
- ✓ Write legibly.
- ✓ Check for accuracy.
- ✓ Provide details.
- ✓ Be polite.

Don'ts

- ✗ Be vague.
- ✗ Request inappropriate or unethical content.
- ✗ Use slang, jargon, or informal language.
- ✗ Give conflicting instructions.
- ✗ Interrupt or change topics abruptly.

Drive adoption with the success kit!

Use the Copilot Success Kit for assets and guidance on adoption best practices!

Download the [Copilot Chat Success Kit](#)

Your secure AI chat for getting work done

Microsoft 365 Copilot Chat

When employees bring unsanctioned AI chatbots at work, they can introduce significant risks—including data breaches, unauthorized access, and the potential for malicious activities.

AI tools often come with appealing features to boost productivity and streamline tasks. However, many do not meet the rigorous security standards required of modern enterprises.

Unlike other alternatives, Microsoft 365 Copilot Chat can help ensure data protection and compliance while also providing every employee with a secure AI chat experience.

82% of leaders say 2025 is a pivotal year to rethink key aspects of strategy and operations¹

Secure AI tools like Copilot Chat help organizations move forward with confidence.

Why Microsoft 365 Copilot Chat is the Secure AI Chat for Everyone

- | | |
|---|---|
| 1 Copilot Chat does not use your data to train foundational models.
To help maintain data privacy and security, Copilot does not use customer data for model training or sharing with OpenAI . This helps safeguard sensitive information and provide peace of mind that data is not utilized for advertising or other unintended purposes. | ✗ Other services may use prompts, responses, and data to train their models, which can potentially expose business data, intellectual property, or personal identifiable information. |
| 2 Copilot Chat adheres to strict protection and privacy standards.
Prompts and responses are covered by the terms of the Data Protection Addendum (DPA) and Product Terms , with Microsoft acting as a data processor. This means customer data is processed only according to the instructions provided by the customer, maintaining the confidentiality, integrity, and availability of the data. | ✗ Other services have vulnerabilities that scientists and researchers have demonstrated can be exploited and security that can be bypassed through jailbreaking techniques. |
| 3 Copilot Chat helps uphold data residency requirements.
The data used by Microsoft 365 Copilot—including prompts, responses, and citations—resides in your geographical region. This means it complies with Microsoft processing commitments for that region, which can help customers ensure compliance with GDPR and EU Data Boundary requirements . | ✗ Other services may store and process data worldwide or restrict data residency options to paid plans. This can be a considerable disadvantage for organizations that must adhere to specific regional regulations. |
| 4 Copilot Chat supports IT controls for you to manage AI usage and resources.
Allow administrators to manage access, agent availability, and operational insights. Better understand what applications are being used and control who can share and access agents to gain the best insights and understand the impact and business value of AI usage. | ✗ Other services can fail to provide IT admins with enterprise-grade management controls, limiting configuration options—creating deployment and adoption risks. |

Kickstart Copilot Chat Adoption in your organization using the [Copilot Chat and Agent Starter Kit](#)

Note: Copilot Chat is available at no additional cost for Entra account users. Additional benefits vary by license.

¹ The year the Frontier Firm is born, 2025 Work Trend Index Annual Report from Microsoft and LinkedIn, April 23, 2025.

© 2025 Microsoft Corporation. All rights reserved. Document accurate as of September 2025 and provided "as-is." This document is for informational purposes only.

Step 4: Expand with agents

Create your first agent: Go to [Copilot Studio](#), → "Create" → select "Employee Self Service". Select a name and review the pre-made topics. Navigate to "Knowledge" → "Add sources". Choose a SharePoint, Word or OneDrive page to add as knowledge source. Navigate "Publish" → "Channels". Select Copilot Chat, Teams and/or SharePoint.

Enable agent credit consumption: Turn on pay-as-you-go and pay \$0,01 / message. Global admin or M365 admins navigates to [M365 Admin Center](#) → Copilot Settings → Settings → Org settings → Copilot. Select Copilot Studio billing policies. Click manage billing and toggle on pay-as-you-go. You are then prompted to link a new or existing Azure subscription. Select subscription and resource group. Confirm region and save.

Or purchase a monthly pre-paid credit pack: \$200 for 25K messages, purchased from your Microsoft partner.

Shadow AI risks and best practices

Mitigate Shadow AI risks with governance

What is Shadow AI and what are the risks?

Organization

Employees are excited to try Generative AI apps due to productivity benefits. Sometimes, they will use apps that are not sanctioned nor managed by IT

Left unchecked, sensitive data (e.g. PII, Intellectual Property) might be shared with "Shadow AI" apps, creating risk of leakage, malicious use, or use to train 3rd party algorithms

Monitoring Shadow AI can help uncover use in the business and manage security, privacy, and compliance risks

How to discover and govern Shadow AI use?

Gaining visibility on Shadow AI apps on the corporate environment (endpoints, network)

Understand the security & compliance risks of the specific cloud AI apps against a common benchmark (GDPR, SOC reports, etc)

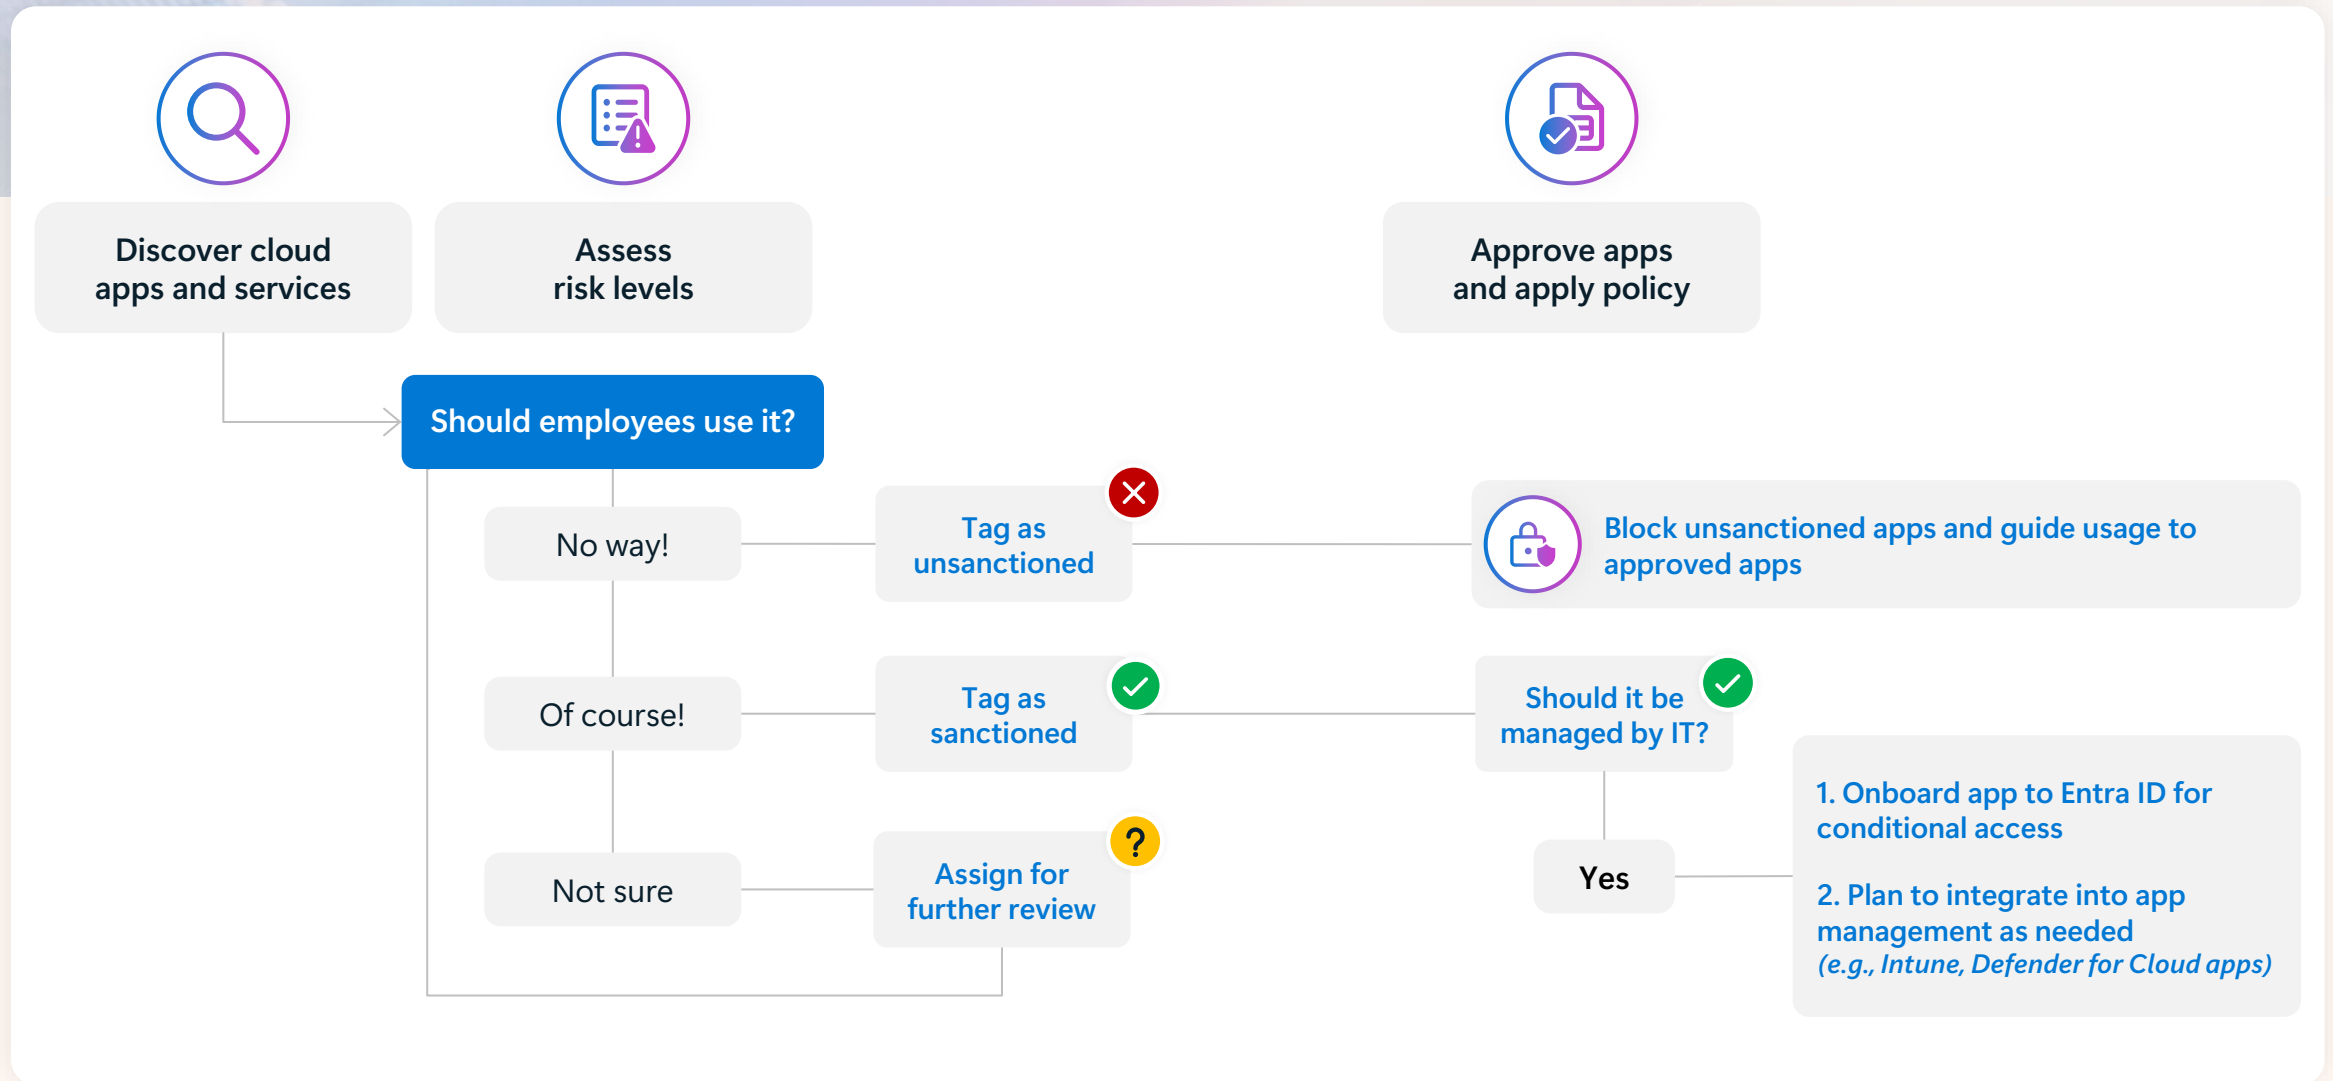

Audit & automatically block unsanctioned apps, while managing relevant apps with IT security

Enhance protection on managed apps by applying data classification best practices

Discover and manage apps in your environment

Assessment and remediation of Shadow AI with M365 E3

Govern

App Catalogue

- General Guidance about different categories of Generative AI Apps
- Risk Assessment

Cloud Discovery

- Upload Firewall / Network Equipment logs to generate reports in dashboard

Remediation

- Configure Defender for Endpoint P1 with an indicator to block / warn

Best Practices

Block Unapproved AI apps

Redirect the user access to a webpage with an Organization message & guiding users to use IT approved apps eg. Copilot Chat with link <https://m365copilot.com/>
