

Get to know Microsoft 365 Copilot

Microsoft 365 Copilot briefing

What we'll cover

1. AI is here to stay
2. Copilot—your AI assistant for work
3. See Copilot in action
4. Get Copilot-ready
5. Next steps on your AI journey

Your AI assistant for work

Microsoft's mission

Empower every person and every organization
on the planet to **achieve more**

AI transformation supports business growth through better productivity, creativity, and operations

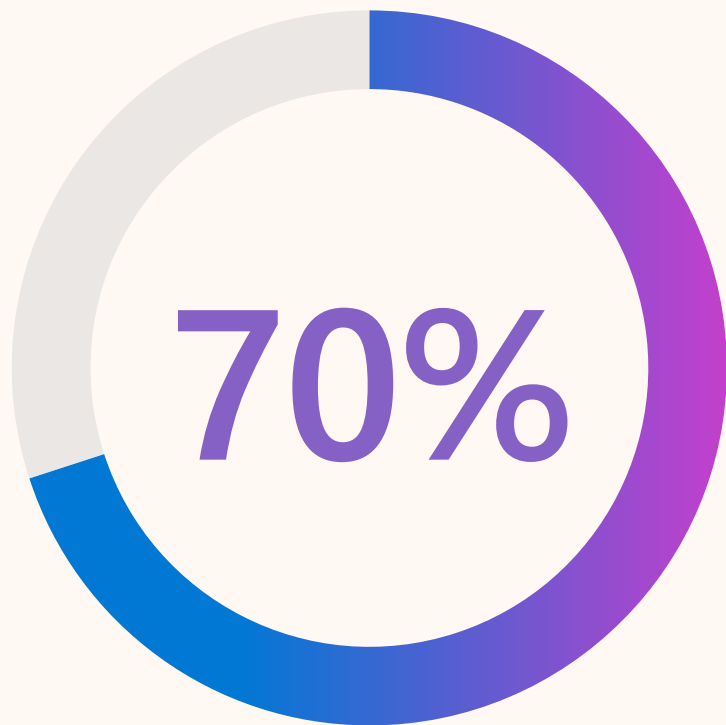

Personal productivity

- Individual efficiency
- Time savings
- Increase creativity

Business value

- Revenue growth
- Cost optimization
- Employee well-being

of the Fortune 500 use
Microsoft 365 Copilot

Honeywell

Honeywell employees are saving 92 minutes per week, and says **Copilot is the equivalent of hiring 187 new employees.**

Copilot agent automates shipping invoice process.
Millions of dollars saved in the first year on shipping operations.

LUMEN

Sellers increased outbound calls by 40% due to process efficiencies resulting in **\$50M annual revenue gains.**

68,000 users saving 3 hours per week per person
with 90% praising the benefits.

FINASTRA

Marketing team's **time to create new campaigns reduced by 75%.**
7 months of work completed in 7 weeks.

20,000 users across functions accelerate rare disease research.

Uses Copilot to **streamline risk management** and reduce time
creating marketing content

Copilot Control System

What sets Microsoft 365 Copilot apart?

1

Personalized AI-first productivity app

M365 Copilot app connects to web, work and business data and brings together chat, search, apps and agents

2

AI integrated in the tools millions use every day

Copilot in Chat, Teams, Outlook, PowerPoint, Excel, and Word, including personalization and voice

3

AI search

New AI powered search integrated with chat and 80+ connectors so you can quickly find disparate information across your organization

4

Advanced reasoning work agents

Researcher and Analyst agents with advanced reasoning over web, work and business data act as virtual employees

5

Platform for agents

Extend Copilot with broad set of pre-built agents or create your own with Copilot Studio, all available in the Agent Store

6

Copilot Control System

Robust security, management, measurement and reporting for Copilot + Agents

Copilot for all

Interpreter

SharePoint agents

Project manager

Skills agent

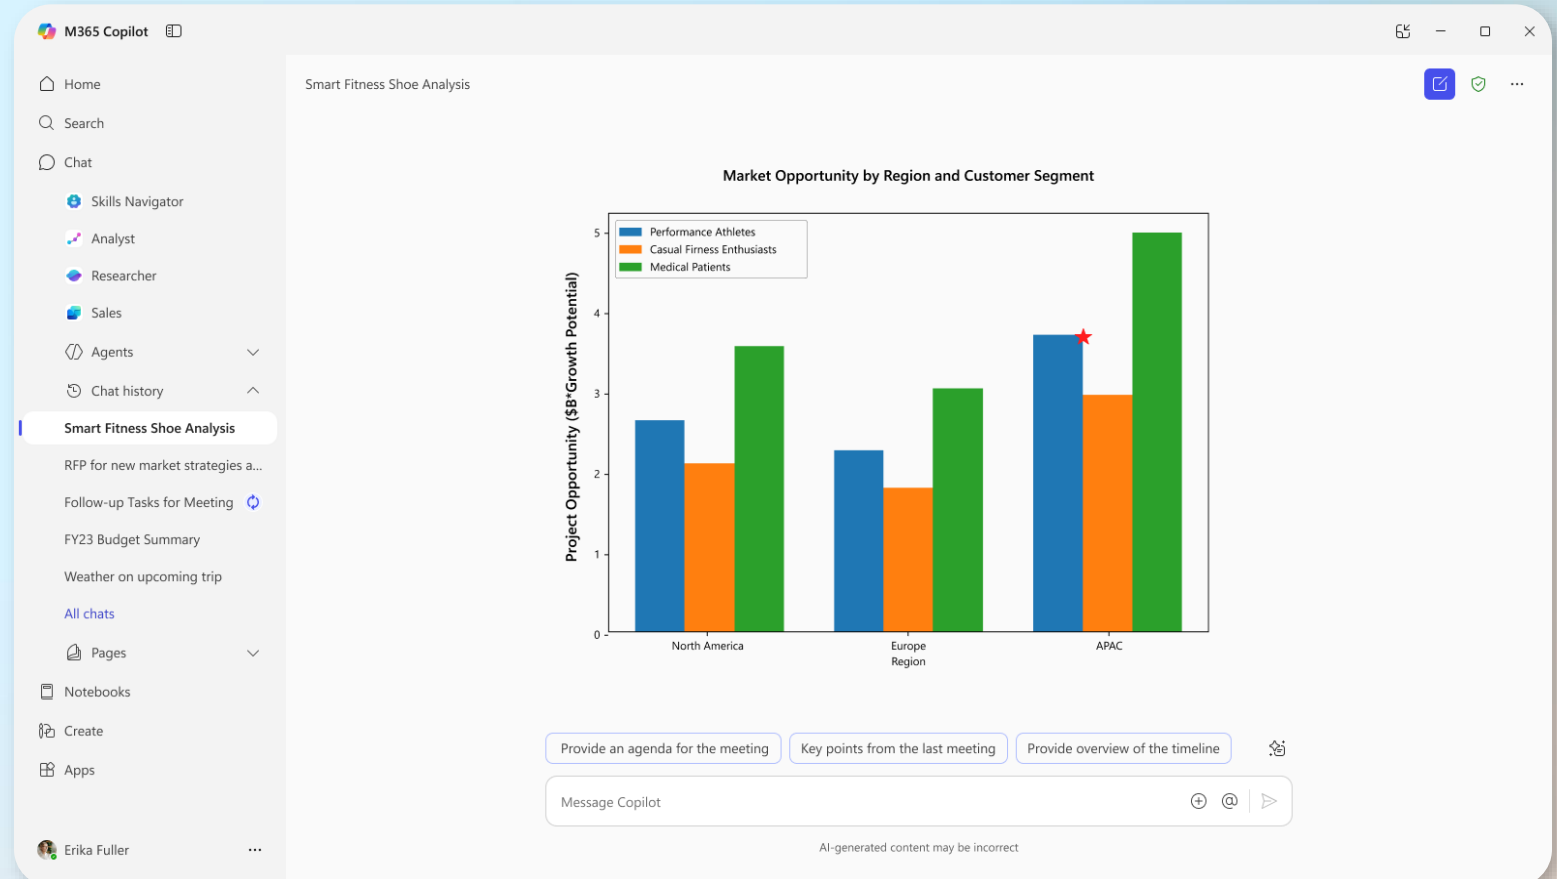

Analyst agent

Analyst thinks like a skilled data scientist, so you can **go from raw data to insights in minutes**.

Built on OpenAI's o3-mini reasoning model and optimized to do advanced data analysis at work, Analyst uses chain-of-thought reasoning to progress through problems iteratively, taking as many steps as necessary to refine its reasoning and provide a high-quality answer.

It can run Python to tackle your most complex data queries—and you can view the code it's running in real time to check its work.

Available Now!

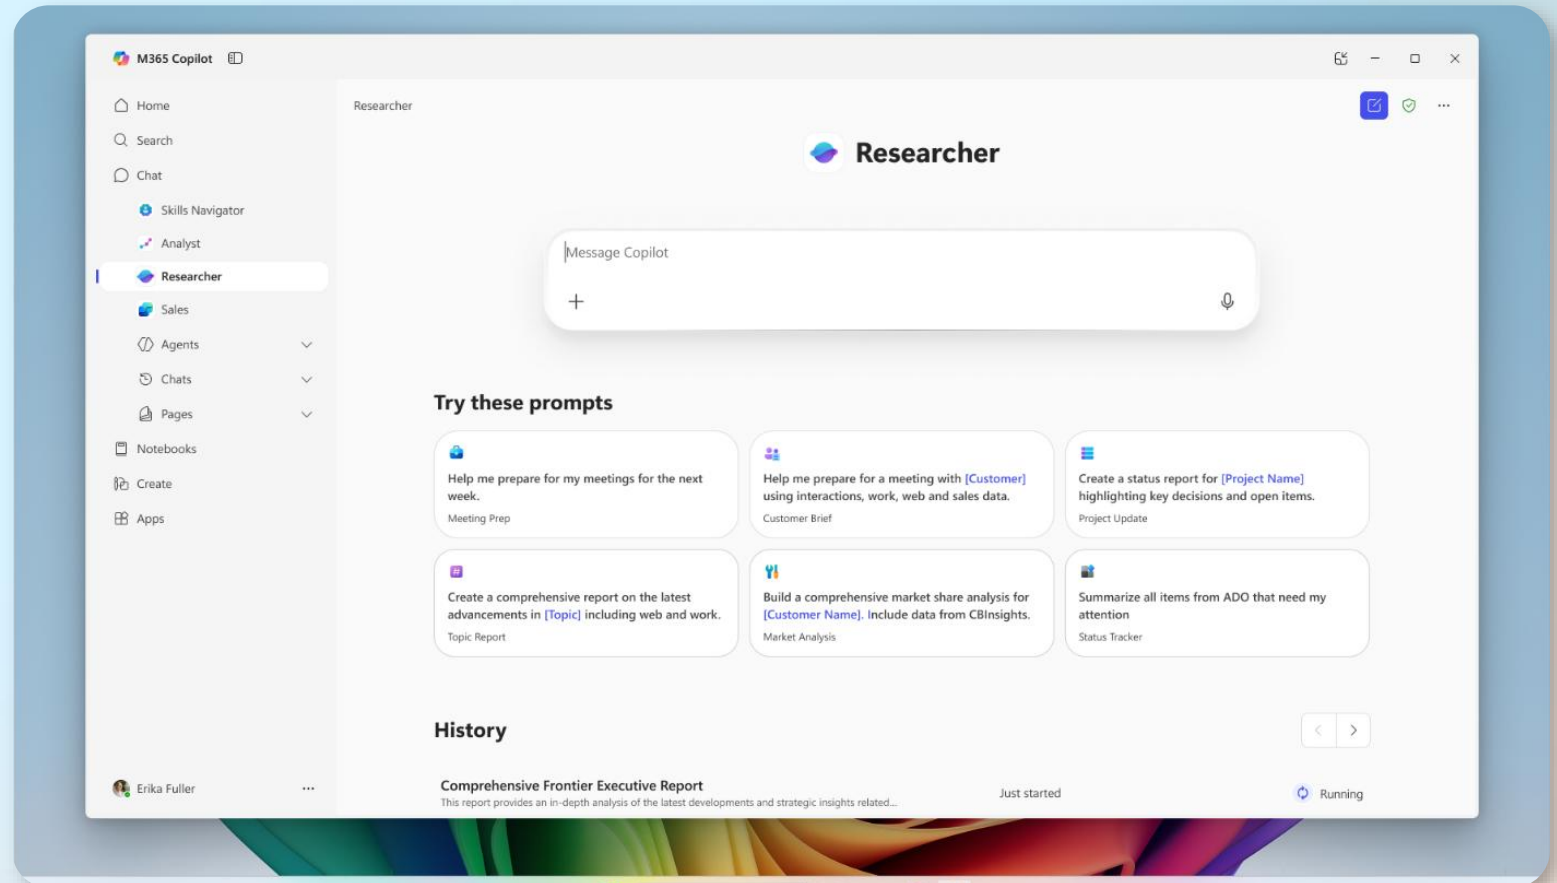

Researcher agent

The Researcher Agent gives organizations the capability they'd expect from a highly paid strategist or researcher.

By combining the most advanced deep reasoning models with Copilot Chat's web- and work-grounding, as well as its agent ecosystem, this agent provides well-reasoned responses to complex prompts with the data that matters most.

For users, this gives them **a thought partner that can perform advanced reasoning grounded in their unique context**, and for an organizations this gives them **on-demand access to the types of work they typically expect from highly paid employees**.

Available Now!

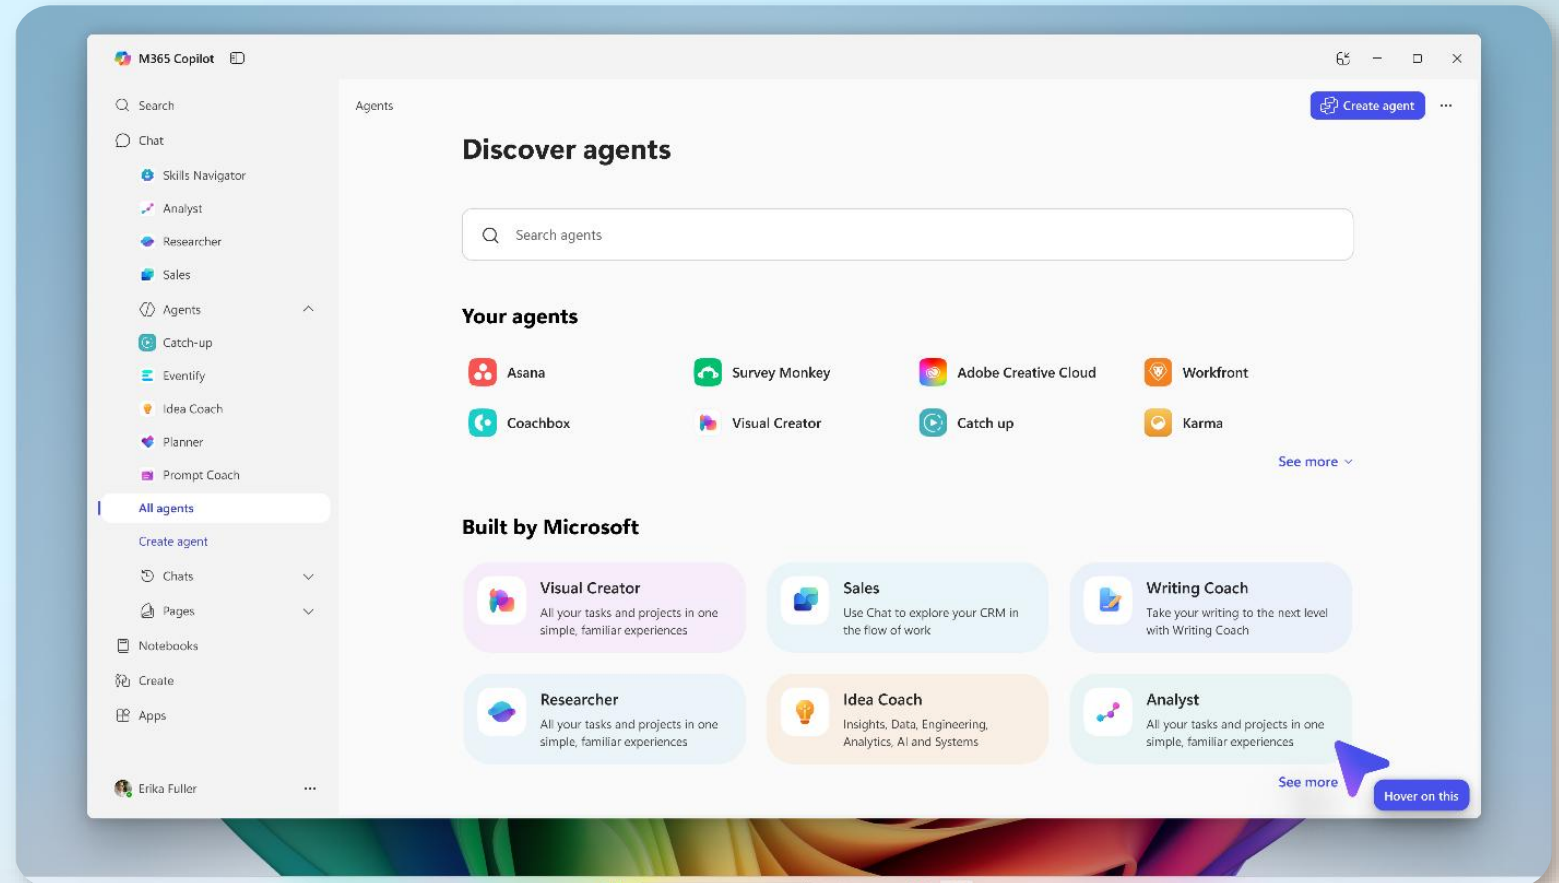

Agent Store

Agent Store is an agent marketplace featuring agents from Microsoft, partners and customer organizations. Its immersive and personalized experience can help customers find and use agents to **transform work processes and elevate productivity**. You can also share agents with colleagues via Copilot Chat or other Microsoft 365 Copilot endpoints to boost collaboration.

All agents, whether developed by Microsoft or partners, undergo **strict validation processes to meet enterprise standards for functionality, security, and compliance**.

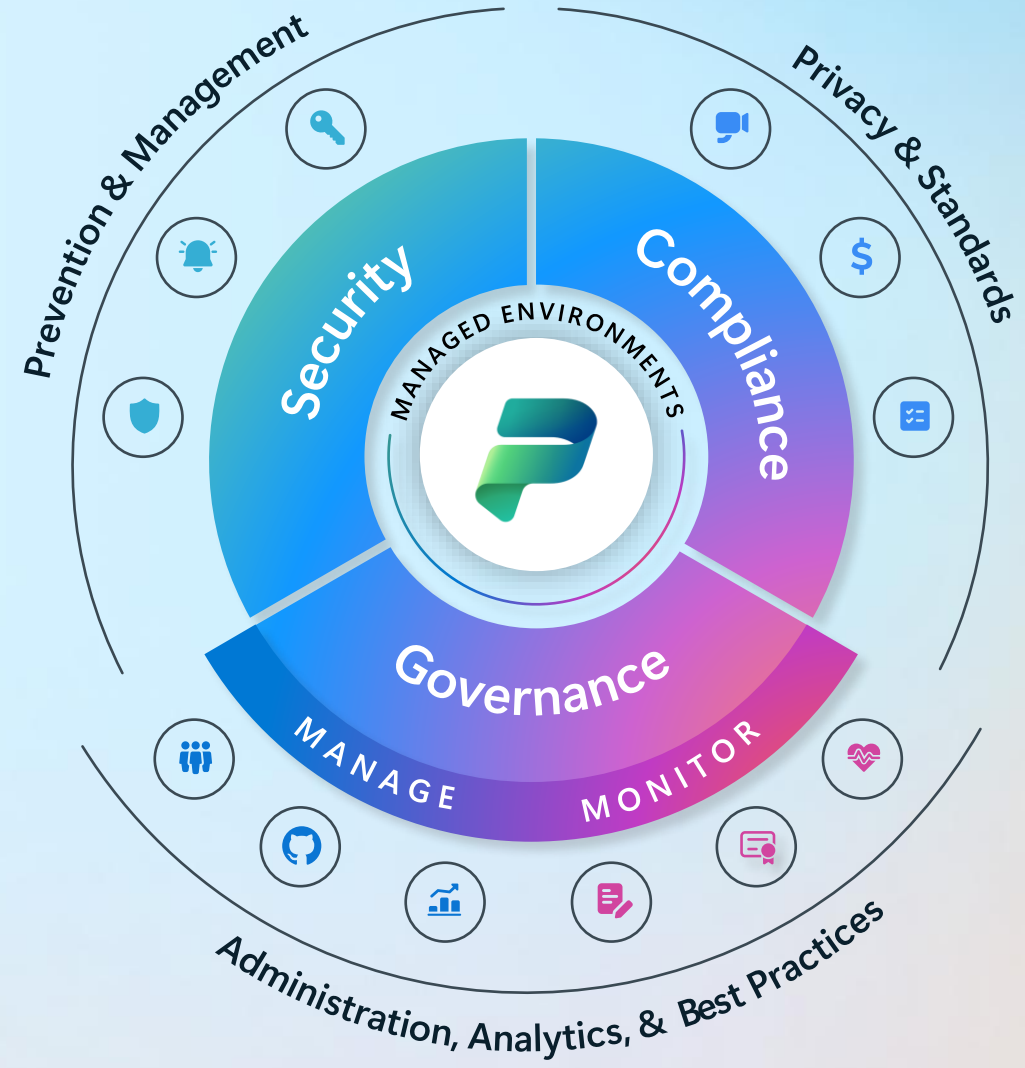

IT admins have full visibility and control over how agents are deployed in their organization.

Lab set up

Lab overview:

This hands-on lab places participants in the role of Sarah, Transformation Lead at Fabrikam Modular Homes, a fast-growing organization experiencing increased operational complexity as the business scales. Participants work inside a pre-provisioned Microsoft 365 lab environment and use Copilot Chat, Microsoft 365 Copilot, and AI agents to address real business challenges spanning leadership decision-making, operations, finance, sales, and customer support.

Through a storyline-driven narrative and role-based tasks, participants produce tangible business artefacts such as research summaries, executive briefings, data-driven insights, meeting recaps, and a custom support agent. The experience demonstrates how AI can reduce friction, accelerate decision-making, and improve how work gets done across the organization.

Lab objective:

Participants will learn how to use Microsoft Copilot to:

- Reason through business problems using Copilot Chat in Web and Work modes
- Apply Microsoft 365 Copilot in Word, Excel, Outlook, and Teams to real work scenarios
- Delegate research and analysis to built-in AI agents
- Build and share a governed custom agent for common business and customer needs

Copilot Live Immersive Lab

This hands-on experience includes immersive, scenario-based labs where participants will apply Microsoft 365 Copilot tools to solve real business challenges across operations, leadership, customer support, HR, and marketing:

1

Strategic framing with Copilot Chat

Use Copilot Chat in Web and Work modes to reason over business challenges, identify sources of productivity loss, and structure insights for leadership decision-making.

2

Leadership alignment with Copilot in Word

Summarize lengthy operational documents, extract executive insights, identify risks, and create leadership-ready briefings using Copilot in Word.

3

Financial and operational analysis with Copilot in Excel

Analyze project efficiency data, model improvement scenarios, and connect operational issues to financial impact using Copilot in Excel.

4

Communication triage with Copilot in Outlook and Teams

Triage emails, identify missed commitments, summarize meetings, and surface key action items across conversations using Copilot in Outlook and Teams.

5

Research and analysis delegation with Agents

Delegate complex research and analysis tasks to built-in AI agents, including market research and scenario modeling with cited sources and quantified outcomes.

6

Real Time Business Intelligence with a Custom Pre-built Agent

Custom agent that connects to LoB apps to retrieve live product status, specifications and warranty data in real time.

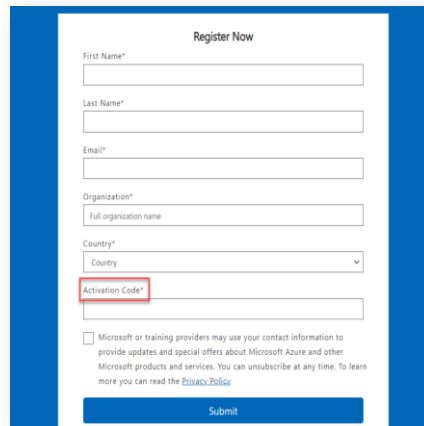

Lab access instructions

1. Open your browser (Edge is recommended) and navigate to **bit.ly/XXXX** (each URL will be different for each lab session. This will be provided by the lab provider after partner registration is confirmed)
2. Fill in the required fields and include the provided access code (see below). After completion of the registration process, a new page will open where user need to click on "Launch Lab" to activate the workshop.
3. Launch the virtual lab environment. It will open a new window in your browser.
4. After click on Launch Lab a screen appears with the following:
 - Lab guide and instructions on the right side.
 - Environment details such as Azure credentials on the right.
 - Virtual Machine on the left side for hands-on activities.

A timer starts immediately upon launching the lab, with the remaining duration displayed in the top right corner. This streamlined experience helps attendees navigate their lab activities efficiently while keeping track of their time.

Users can choose to keep the lab guide and instructions docked on the right side or open them in a separate window for a full-screen view of the virtual desktop.

Access Code: **XXXXXXX**

Marketing

Increase revenue and optimize costs in marketing

Identify your scenarios

Key processes

Before AI

Customer insights & strategy

The process of gathering customer insights often relies on fragmented data sources, leading to incomplete customer profiles and missed opportunities for targeted engagement.

Demand generation

Broad and untargeted campaigns can result in misaligned marketing efforts and lower demand capture and conversion rates.

Content creation

Content creation relies on manual research and creativity, which can lead to inconsistent messaging and a slower time-to-market for marketing materials.

Campaign execution

Manual coordination and tracking, leading to inefficient resource allocation, higher operational costs and lack of agility to adapt to market responses.

After AI

[Streamline market research and strategy](#)

Copilot assists in analyzing market conditions and competitive insights from internal and external sources and recommends marketing strategies based on impact and business goals

[Guided demo](#)

[Targeted campaigns](#)

Copilot analyzes customer data and info from external sources to create highly targeted marketing campaigns that are optimized for high propensity opportunities across marketing channels.

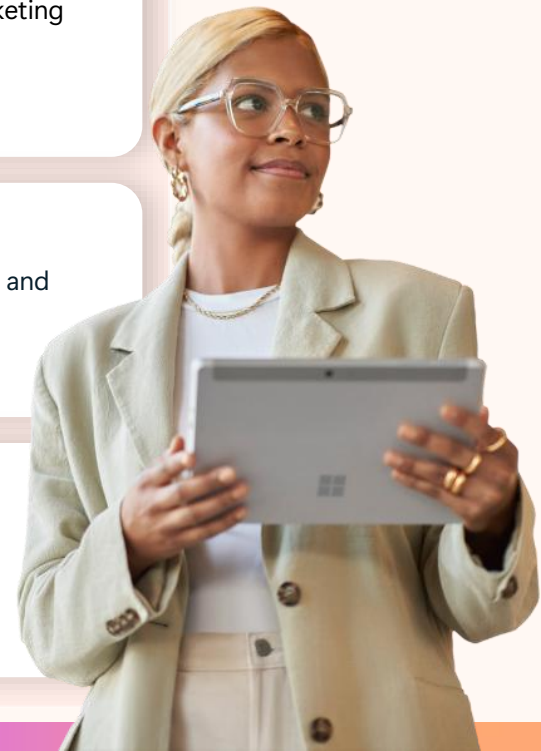

[Campaign performance tracking](#)

Copilot assists user in analyzing campaign performance enabling marketers to swiftly identify and incorporate the most impactful marketing tactics, ensuring a more strategic and effective deployment of marketing resources

[Create marketing BOM](#)

Copilot empowers marketers to generate creative, relevant, and personalized content at scale, significantly reducing the time and cost traditionally required for content development

[Guided demo](#)

Copilot Studio

KPIs included in the BCB

Finance

Optimize costs in finance

Identify your scenarios

Key processes

Before AI

Planning & analysis

Reactive rather than proactive processes leading to reduced ability to capitalize on market opportunities.

Risk management & compliance

Data silos and lack of scenario planning characterized by delayed responses to market changes, leaving the organization vulnerable to unforeseen financial threats and compliance breaches.

Procure to pay

Inefficient invoice processing and procurement approvals, inconsistent policies, lack of spend intelligence resulting in higher costs.

After AI

[Financial insights](#)

Use natural language and smart plugins for SAP, Oracle, and other 3rd party tools to extract insights and transform complex data into clear, actionable intelligence

[Build a business case](#)

Copilot helps with analysis, enabling real-time scenario modeling and reducing time to deliver insightful, evidence-based proposals
[Guided demo](#) ➞

[Accounting document evaluation](#)

Copilot can help by rapidly identifying discrepancies, predicting future trends, and ensuring compliance with financial regulations

[Automate financial query management](#)

Automate routine financial processes and alert designated process owners to take action. Answer internal queries, reducing case volume and increasing efficiency of internal teams.

[Contract review](#)

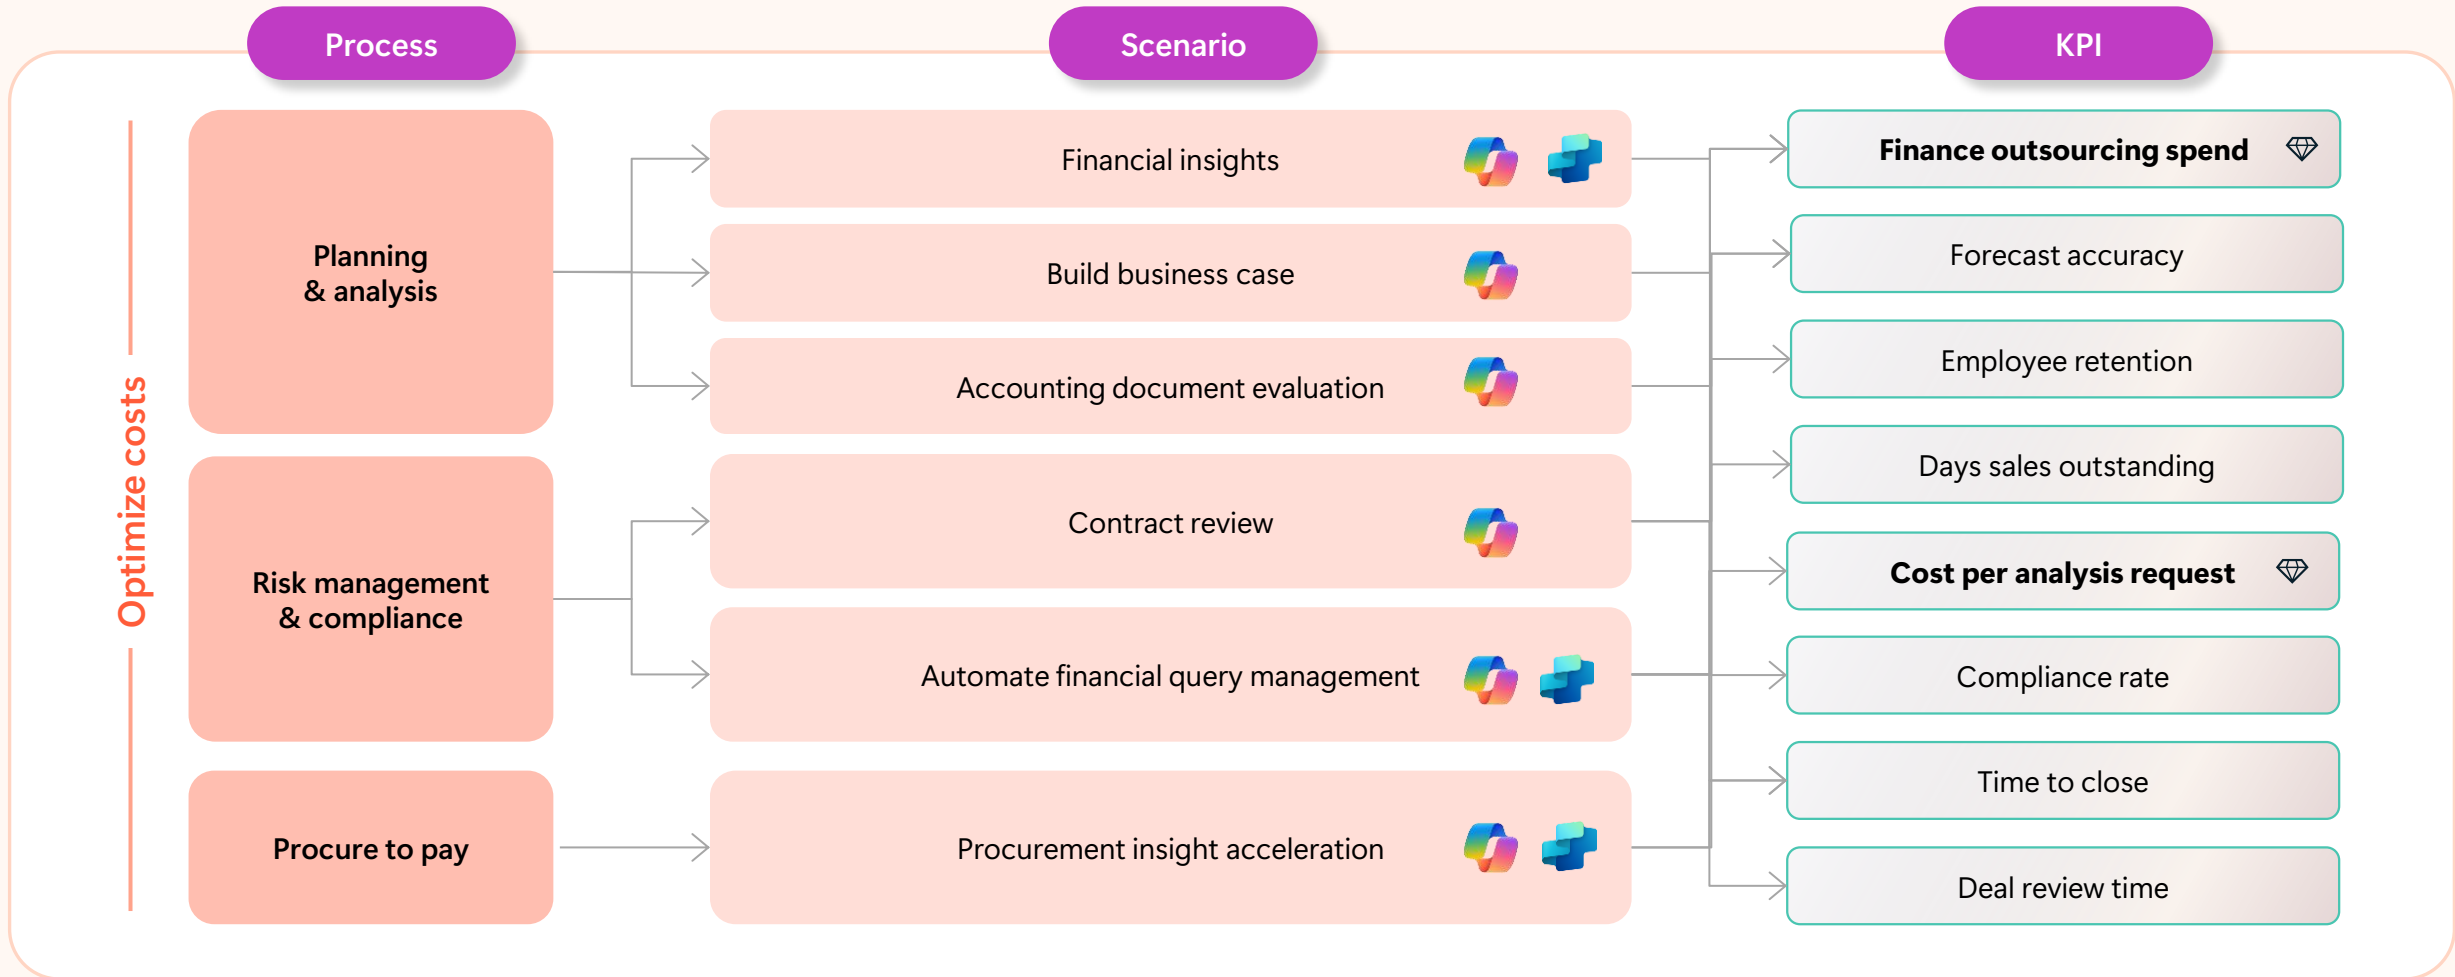

User asks Copilot to translate, review, and extract key insights from customer contracts, tender documents, and amendments.
[Guided demo](#) ➞

[Procurement insight acceleration](#)

Faster speed to insights for contract data, supplier spend, and procurement business processes while uncovering cost-saving opportunities with unprecedented speed—plus, automate tracking, management, and reporting of invoices
