Balancing innovation and control

Maker

How can I **build a conversational agent** that will answer on my behalf?

How can I build agents that can **drive efficiency and save efforts and costs** for our enterprise?

CISO

How can I **protect my data** from external threats?

How can I **prevent data exfiltration**?

How can I **stay compliant with regulations**?

How can I **assess the risk**?

CIO

How can I ensure that solutions people are building **follow guidelines**?

How can I gain **visibility** to what is getting used?

How can I get **experts to review agents** before they get shared broadly?

How can I drive **cost efficiency and ROI**?

Microsoft 365 Copilot

Microsoft Purview

Secure

Honors your existing permissions

Protects against data loss and insider risk

Assess oversharing risks and apply recommended corrections

Govern

Supports your lifecycle policies and audit requirements

Detect and investigation non-compliant and unethical usage

Guided assistance to remain compliant with AI regulations

A complete solution to secure and govern Copilot

Options to secure and govern Microsoft 365 Copilot

Foundational

Microsoft 365 Copilot* + Microsoft 365 E3

Foundational site governance tools to discover, manage, and restrict site access, and streamline site lifecycle management

Microsoft Purview

Foundational data security, compliance, and governance capabilities that provide protections for content that Microsoft 365 Copilot creates and references

Optimized

Microsoft 365 Copilot* + Microsoft 365 E5 Compliance

Everything in Foundational, plus:

Microsoft Purview

Comprehensive security, compliance, and governance:

- Proactive and reactive risk identification and alerts
- Policy suggestions to mitigate your specific risks
- Enforcement of file level access controls and data loss prevention policies
- Visibility to prompt and response text and referenced files
- Use AI to identify risky user patterns and automatically add them to more strict security policies
- And more

Address oversharing concerns and data loss

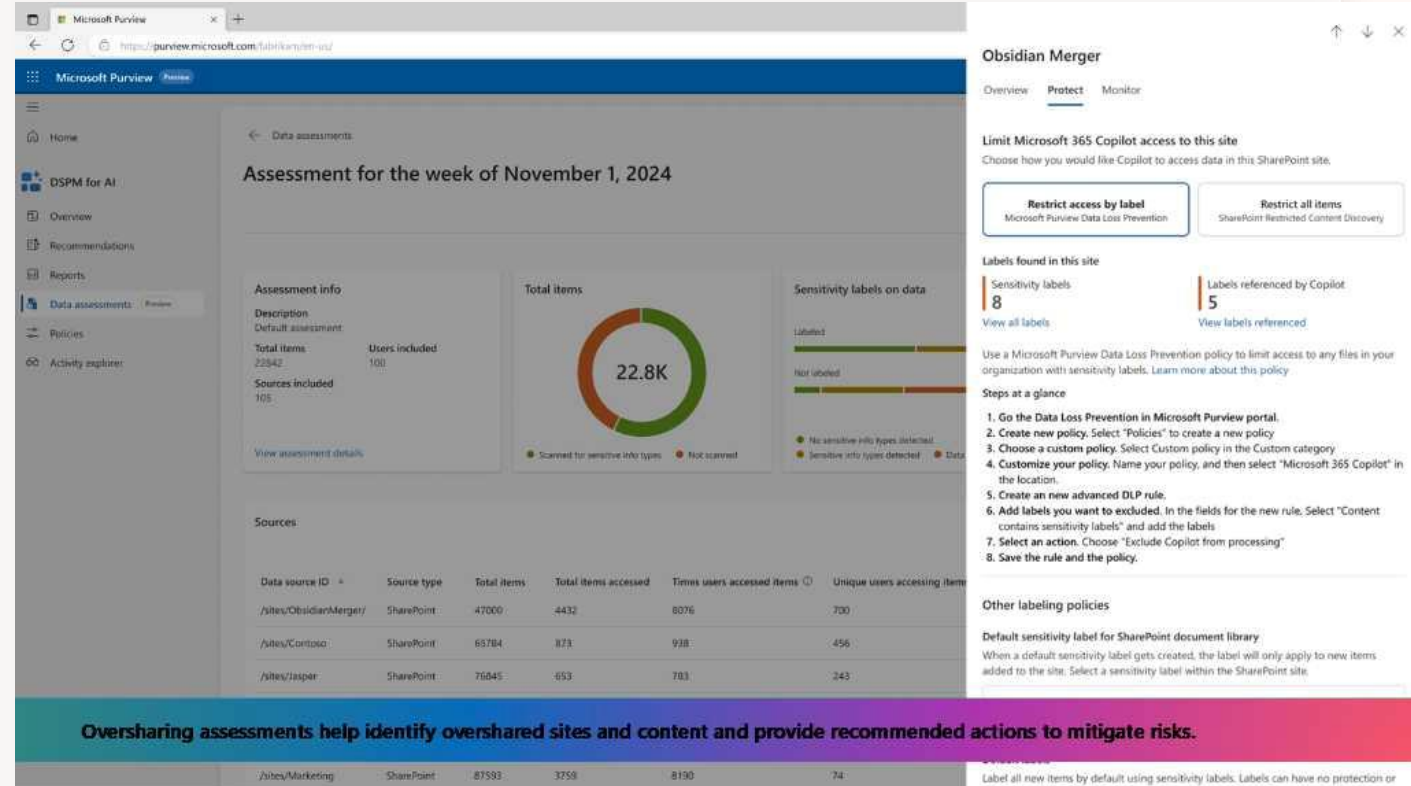

Foundational controls:

- Identify and reduce overshared content
- Manage data and site access
- Protect responses with inherited and outputs sensitivity labels

Optimized controls:

- Prevent Copilot from processing sensitive files
- Added visibility into and control over sensitive data in Copilot and agent interactions
- Restrict or block a user if risky behavior is detected

Protect against AI-focused attacks and insider risks

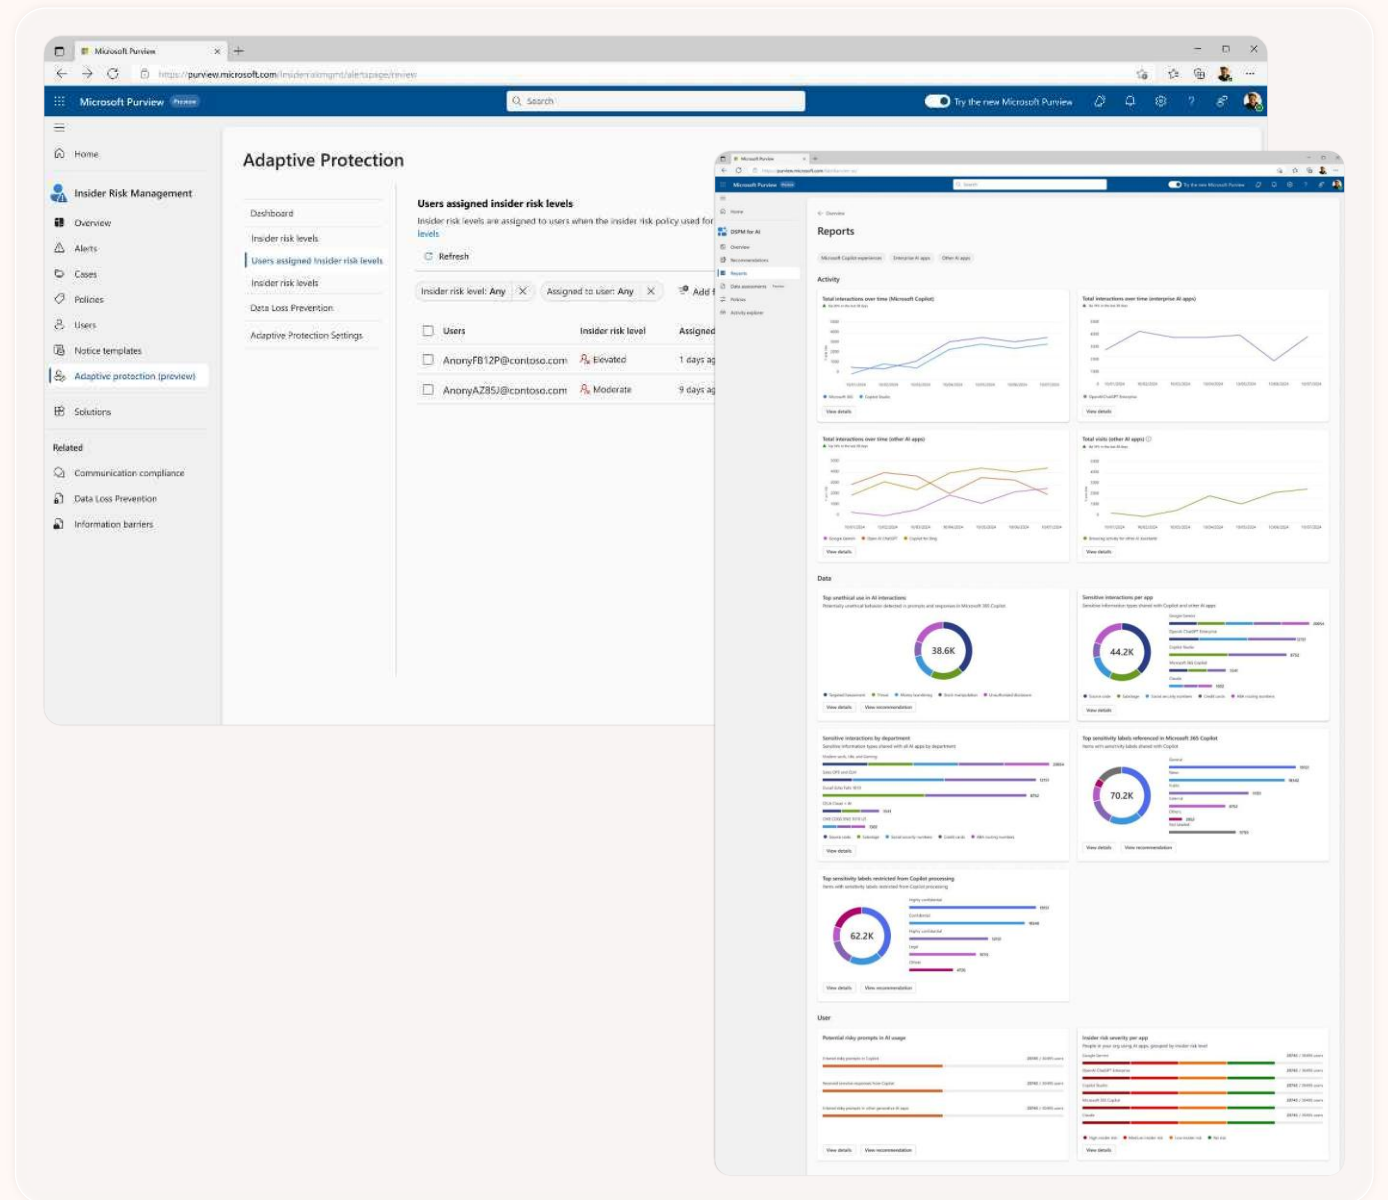

Foundational controls:

- Built-in protection against prompt injections attacks and harmful content in Copilot
- Controls in Entra to restrict user access to AI apps

Optimized controls:

- Detect suspicious interactions within Copilot via controls found in Defender
- Generate detailed alerts to support investigations

Govern AI use to meet regulations & policies

Foundational controls:

- Controls and visibility over web-grounded search
- Implement retention policies, litigation holds, activity audit, and defensible eDiscovery of AI interactions

Optimized controls:

- Receive alerts and use investigative tools for potential compliance and ethical violations

The screenshot displays the Microsoft Purview interface, divided into two main sections. The top section, titled 'Communication compliance', shows a list of policies under 'Copilot for Microsoft 365 - Fraud'. A table lists pending items with columns for Subject, Tags, Sender, Recipients, Sentiment, and Date (UTC). A detailed view of a selected item shows a message from Diego Siciliani to Copilot in BioChar, with a detected condition about gifts and entertainment.

The bottom section, titled 'EU Artificial Intelligence Act', shows a list of controls under 'Your improvement actions'. A table lists various controls with columns for Improvement actions, Service, Achievable points, Last updated, Solutions, and Action type.

Improvement actions	Service	Achievable points	Last updated	Solutions	Action type
Archive logs and reporting on entitlement management	Microsoft 365	27	10/2/2023	Microsoft Entra ID	Technical
Automate log retention	Microsoft 365	27	11/26/2024	Audit	Technical
Block applications that don't use modern authentication	Microsoft 365	9	2/1/2024	SharePoint	Technical
Configure and enable user risk policies	Microsoft 365	3	9/17/2023	Microsoft Entra ID	Technical
Configure and manage capabilities for real-time threat s...	Microsoft 365	27	10/2/2023	Microsoft Defender for Endpoint	Technical
Configure automatic log upload	Microsoft 365	1	10/2/2023	Microsoft Defender for Cloud Apps	Technical
Configure filters for enhanced compliance monitoring	Microsoft 365	9	11/26/2024	Communication compliance	Technical
Configure user consent settings to applications	Microsoft 365	27	10/2/2023	Microsoft Entra ID	Technical
Configure users consent to applications	Microsoft 365	9	10/2/2023	Microsoft Entra ID	Operational
Consult a threat expert	Microsoft 365	1	10/2/2023	Microsoft Defender for Endpoint	Technical
Create a sensitive information type policy	Microsoft 365	9	9/17/2023	Microsoft Information Protection	Technical
Create and maintain a terms of use agreement	Microsoft 365	27	10/2/2023	Microsoft Entra ID	Technical
Create and manage access reviews	Microsoft 365	27	10/2/2023	Microsoft Entra ID	Technical
Create and manage automated workflows	Microsoft 365	9	11/26/2024	Communication compliance	Technical

Determine how Copilot licenses and agents are deployed

- Manage Microsoft 365 Copilot license assignment and control access to agents
- Monitor messages capacity for both prepaid as well as pay-as-you-go consumption

Control agent production workflow and sharing

- Allow list a set of Connectors and Actions
- Limit agent sharing of co-authors or end users
- Disable publish by blocking certain/all channels
- Define Pipelines to certify agents for production & broader sharing
- Identify ownerless agents and reassign
- Manage agent capabilities, data sources and custom actions

Manage and optimize the use of Copilot and agents

- Pay-as-you-go billing: Configure billing settings to manage costs effectively
- Detailed insights into agent message consumption
- Set limits and policies to manage agent consumption

*Agent business impact report coming H1 CY25

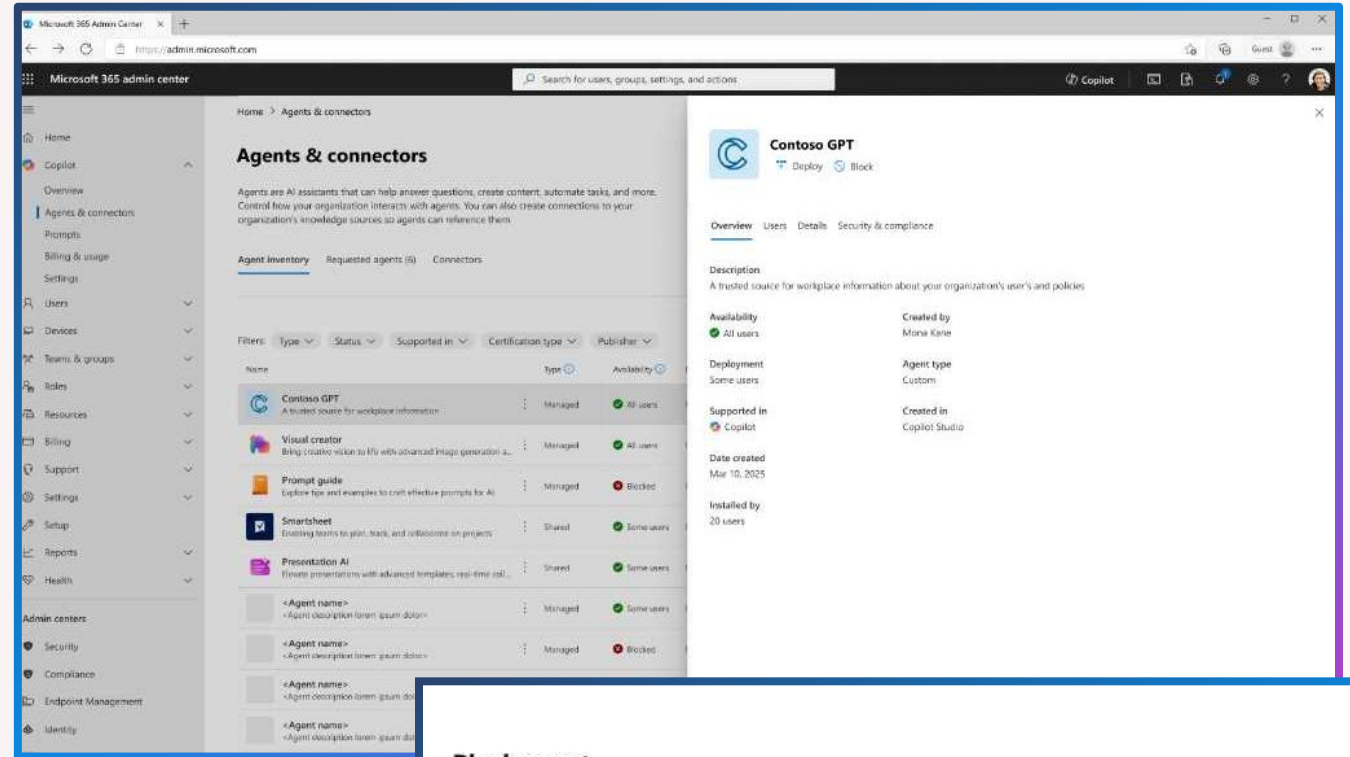

Block agents

IT admins can go to the Agents & connectors section, "Agent Inventory" filter to Shared Agents to view and block individual agents in the tenant

- Metadata for shared agent info (creator, # users with access)

Coming soon

- Sensitivity label for agents – [June]
- SharePoint agents in inventory – [June]

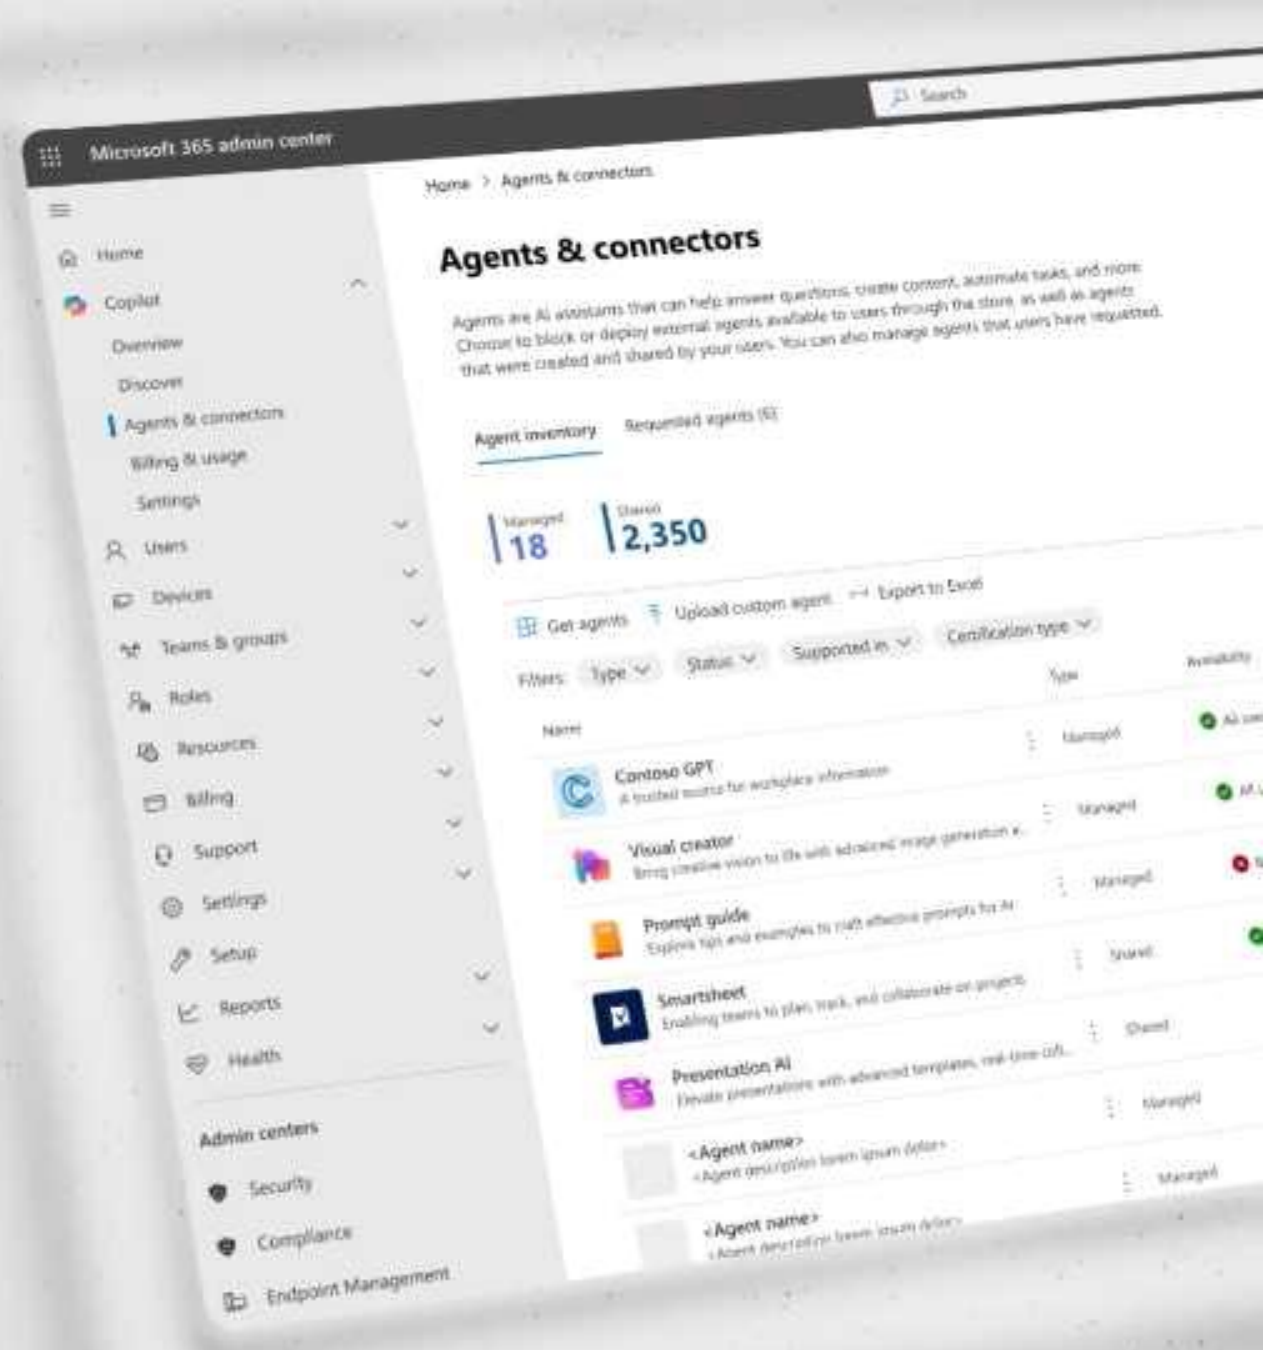

Block agent

If you block this agent, people in your organization can't install or use it. It will be removed from any user who has already installed it.

☒ Block {agentName}

Copilot Analytics

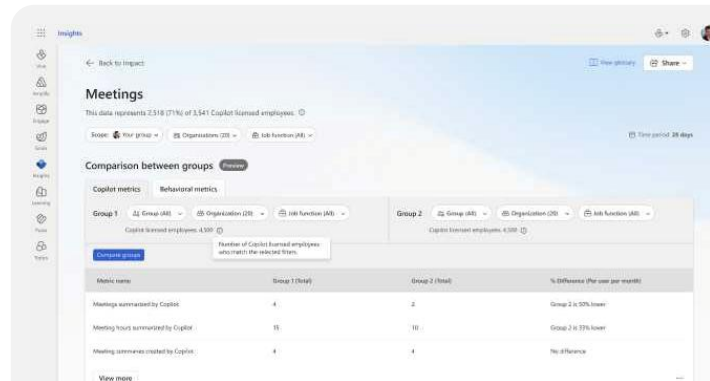

Measure the impact of Copilot and agents on your business

Admin Center

Readiness and adoption

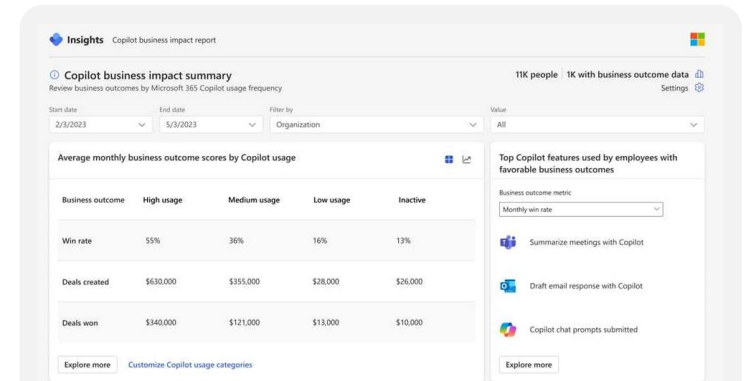

See Copilot and Agents usage and adoption trends

Copilot Dashboard

Productivity impact

Explore how AI transforms the way your teams work.

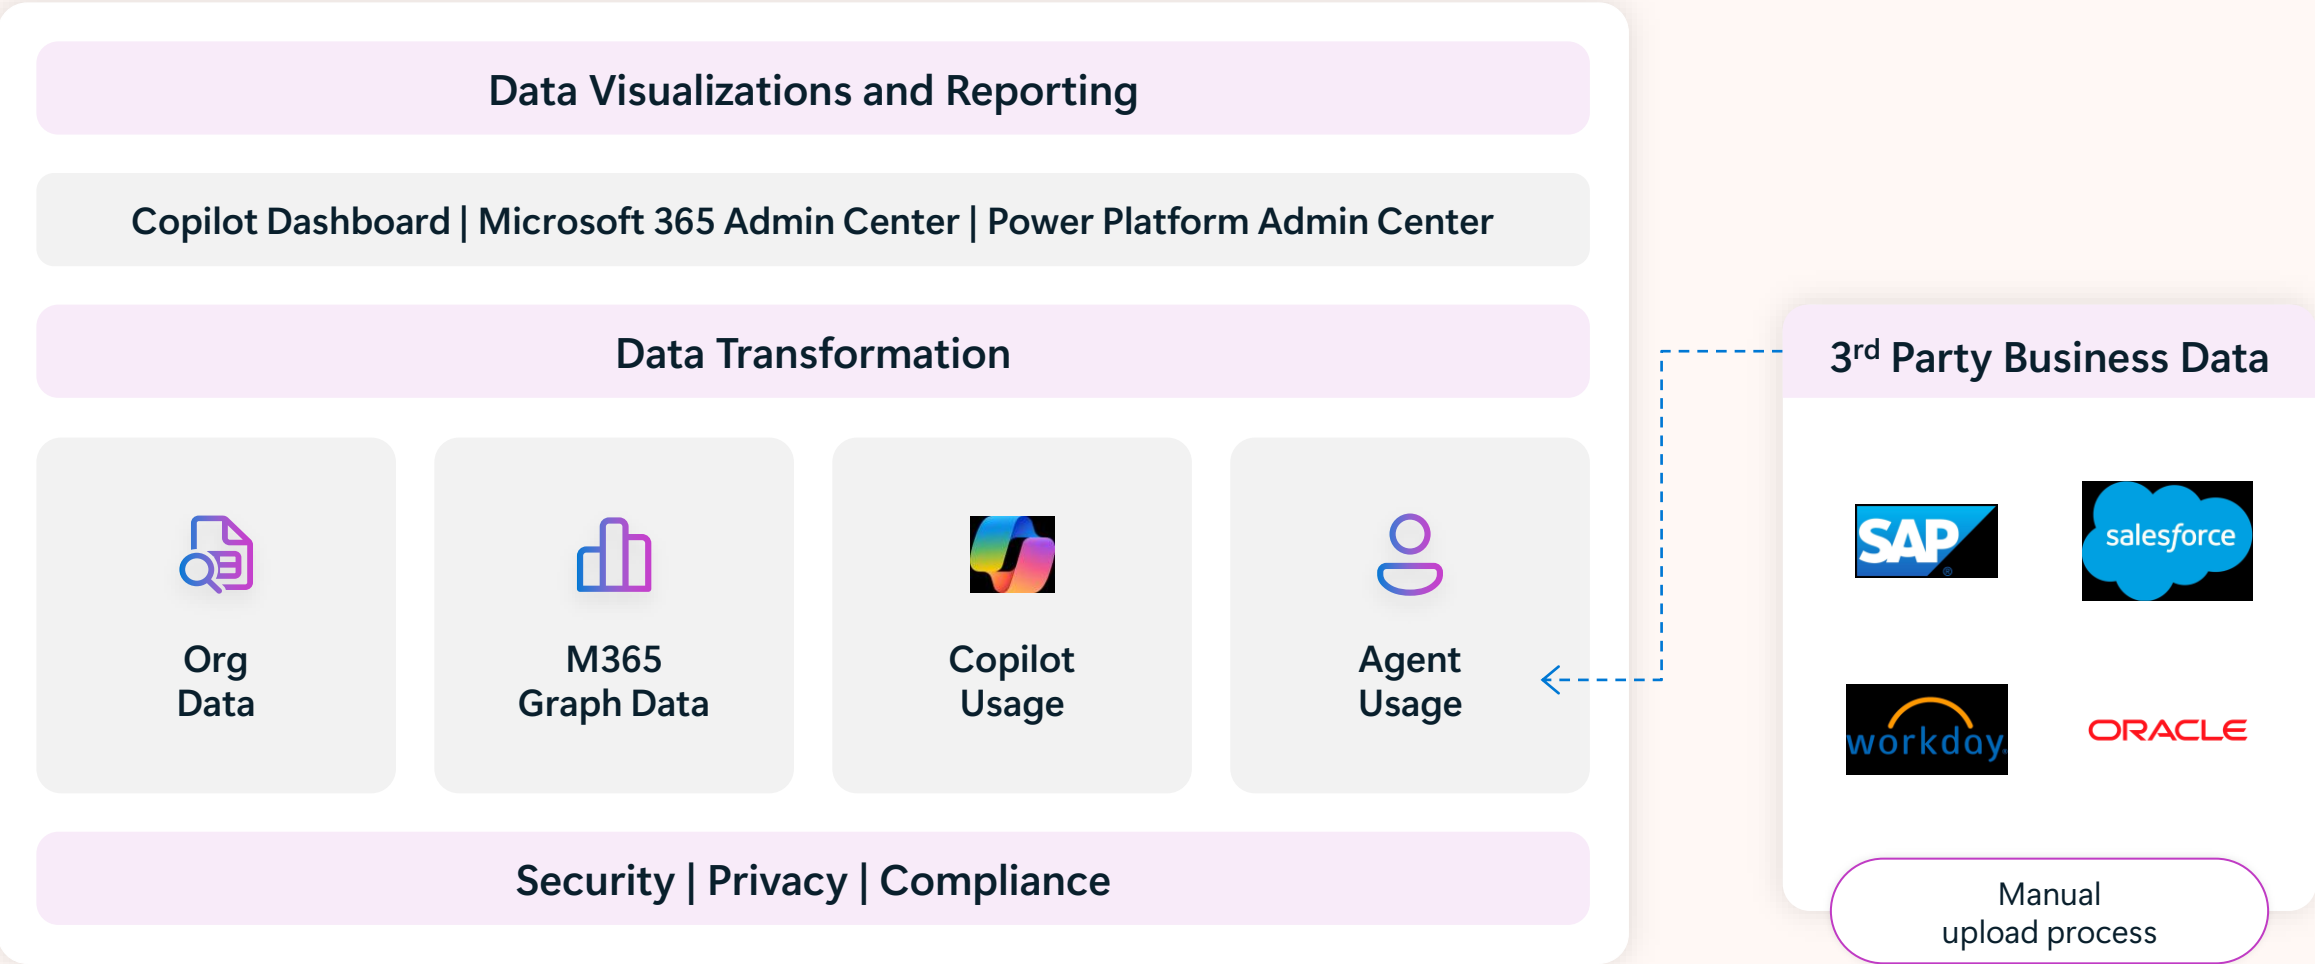

Advanced Reporting (Insights)

ROI

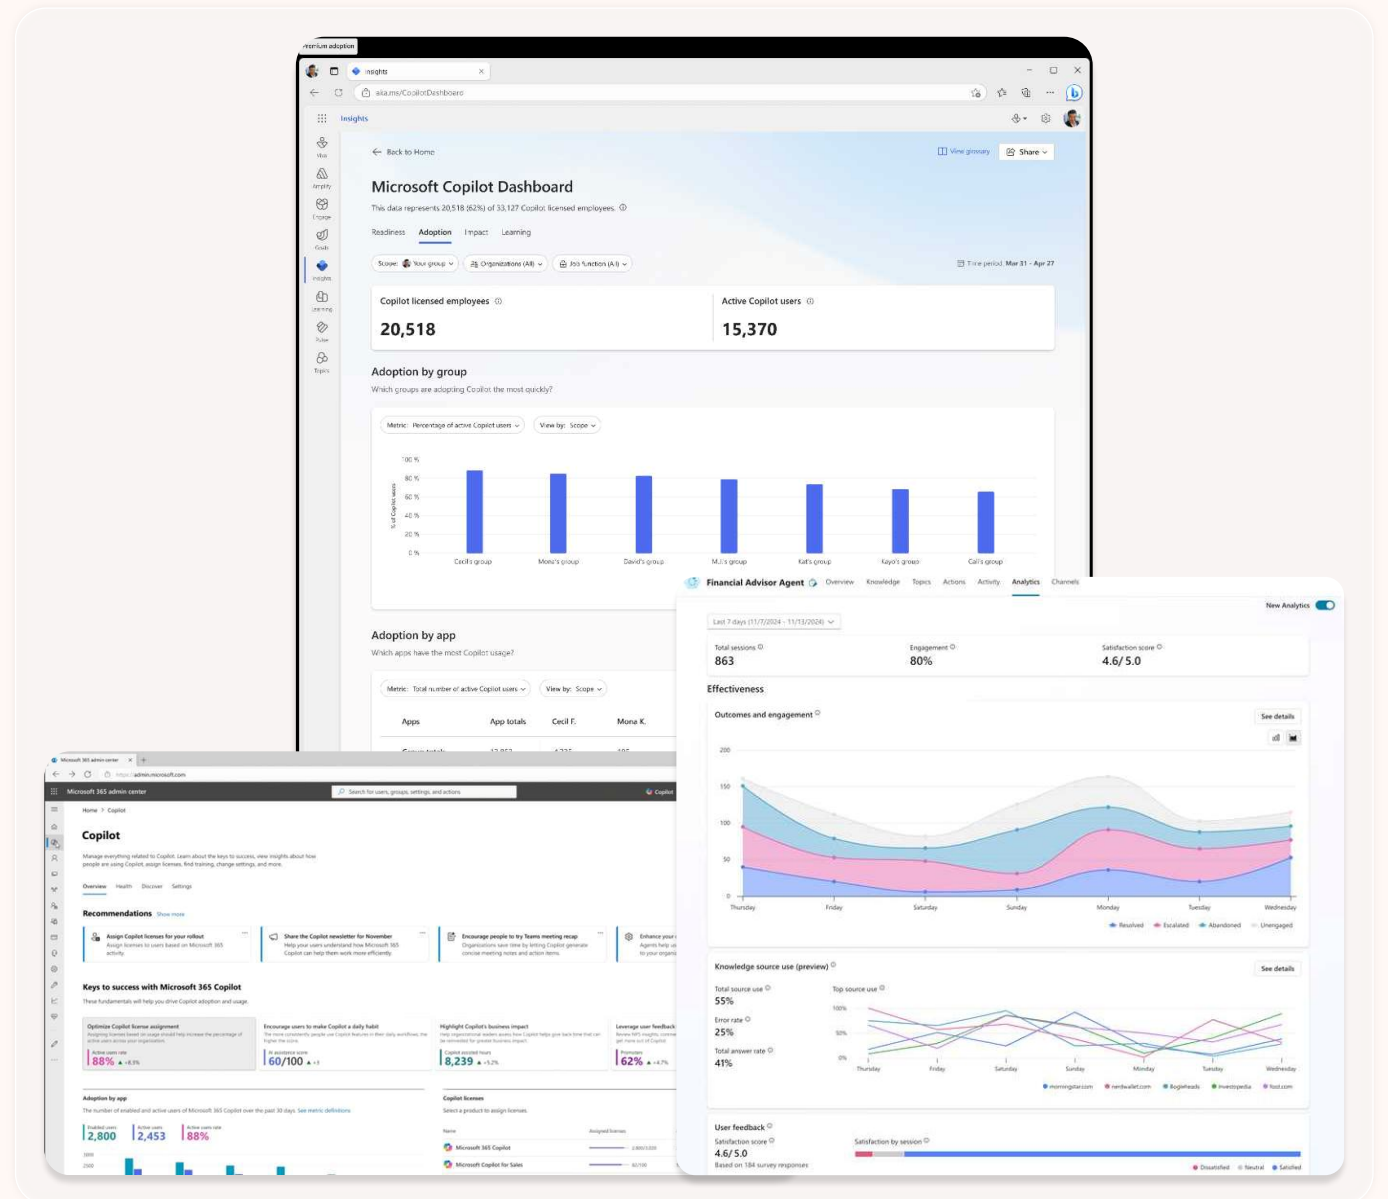

Measure the value of Copilot and Agents on your business processes

How it works

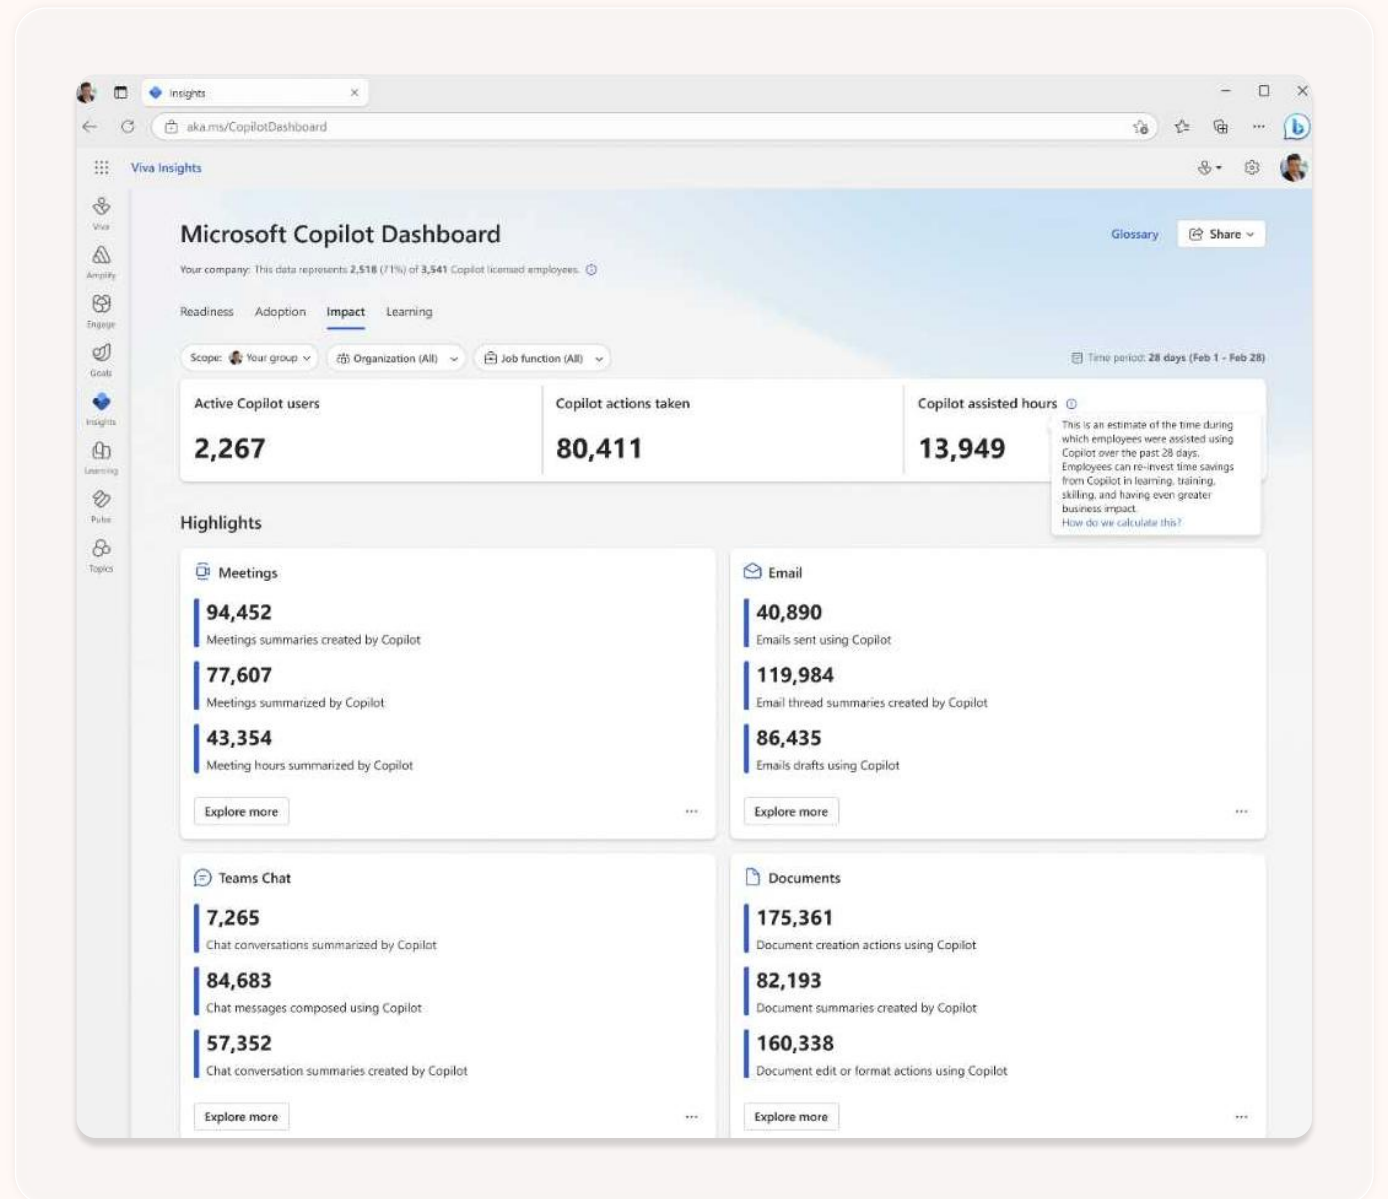

See Copilot and Agents usage and adoption trends

- View Copilot licensing and activation status by groups
- Evaluate agent billing, usage, and success rates of performance and control spend
- Compare usage and adoption trends across groups, organizations, and functions over time

Explore how AI transforms the way your teams work

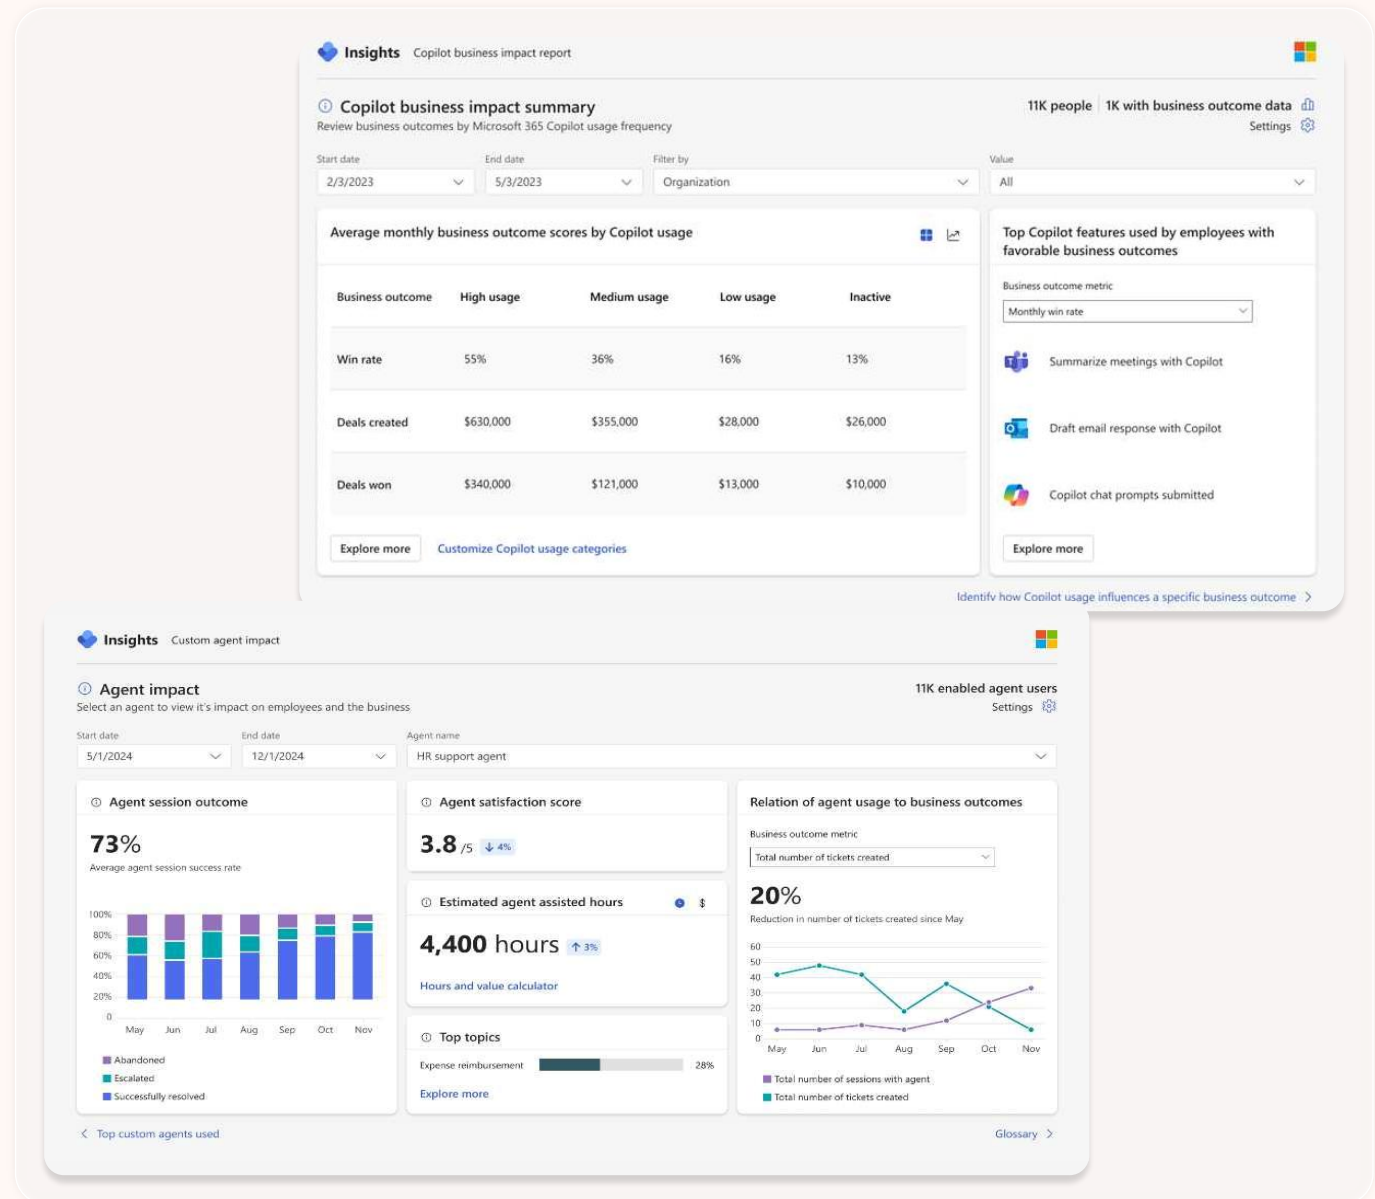

- Understand how employees use Copilot and agents to save time and work smarter across Microsoft 365 apps
- See how workplace patterns and collaboration shift with the use of AI
- Measure employee sentiment about Copilot and compare it to industry benchmarks

Measure the business value of Copilot and agents

- Evaluate the impact of Copilot and agents with your key business metrics
- Customize your analysis for any function with data and metrics from your business
- Identify opportunities to improve adoption and impact
- See time savings and value with AI-assisted hours and calculators
